(1)Say to my king, (2)to my mountain goat, fair of limb, (3)eagle-clawed highland horse, (4)to my date palm growing in a sacred place, laden with glistening dates, (5)say moreover: (6/8)Saying (the words of) Abaindasa, officer of the armed forces, (7)who, (to obtain) his master's favor, is a constant delight to his master's heart:

(9)Being strong, I want to follow my king,[16] (10)having vision, I want to go in your vanguard, (11)at your command please let me be your messenger! (12)Even when water is still, I can make water flow; (13)even when the wind is still, I can winnow grain; (14)even when the boat is still, I can row! (15)I am a (trained) scribe—I can inscribe a stele! (16)I can…the orders of the army. (17)The orders of the assembly…(18)As if I were planting a tree in my own woodlot, I kneel in the dirt; (19)as if someone had managed to tie me to my own chair, my hands are tied with rope; (20)in my own city, where I used to dress in fine clothing, I am forced to wear dirty rags; (21)forced to wash in clods of dirt, there is dirt on my face. (22)A beast devours cadavers, but then retreats, (23)even after the king of beasts makes a kill, he slackens his jaw;[17] (24)even after the canebrake is consumed by fire, the pond remains (intact),[18] (25)and even Utu, after consuming (offerings of) ghee and cheese, still reaches out to (accept offerings from) a pauper's table;

(26)(But now) my life hangs by a thread; please take my hand! (27)I am a widow's son; I have no one to show concern for me. (28)Ah, but me—when will Šulgi, my king, restore me to my position? (29)May my king show his concern for me and restore me to my prosperous position!

---

[15] No two manuscripts agree on the first two words of the line.
[16] Vars.: I am strong, I want to follow my king; I am strong, so let me be your soldier.
[17] Var: it spares some remains.
[18] Var.: it spares some ponds.

(1)Say to my king, (2–3)thus says Sîn-tillati, the frontier commander, your servant:

(4)When I went upstream to Kakkulatum, (5)the armed Amurrum ambushed (us). (6)When I (counter) attacked, I slaughtered 600 (of them), captured 1200 (and) (7)brought (the captives) into Kakkulatum.

(8)If my king commands (the captives) to camp among the army, (9)let him send provisions for them. (10)If my king does not order them to camp among the army, (11)he should put them into service (elsewhere). (12)This my king should know.

Commentary

1. -ĝá in place of -ĝu$_{10}$-ra/ur (see also SEpM 4:1) is a neologism attested from Ur III but especially in OB.

2. The precise meaning of the title *rabi sikkatim* is uncertain. Stol 2004, 666f. argues that *sikkatum* here refers to the peg by which gates opened and closed. In particular, he references an OB omen (YOS 10 45:16) suggesting that this officer was originally in charge of the city gates: "the *rabi sikkatim* will open the city gate and…allow the enemy to enter the city." By extension, then, the *rabi sikkatim* in our text would have been in charge of the gates of the land, i.e. the periphery. That Sîn-tillati was charged with defending the borders certainly fits with the contents of this letter.

4. For Kakkulatum, a city located on the Zubi canal in the Diyala, at the southernmost point of access from the Tigris to the Euphrates, see Durand 2000, 362f. For further references see also Röllig 1976–1980, 288f.; Frayne 1992, 45; Heimpel 2003, 614.

5. šubtu$_5$(KASKAL.TÚL)—and variants—is rare, used in Sumerian to describe an ambush in reference to persons (e.g. DuDr 45; CKU 20: 12) or a lair in reference to animals (e.g. IdD D 17). See Alster 1972, 99 with references. For the lexical attestations see CAD Š/III 172.

8. The variant in X16 (lugal-ĝá ugnim-bi) makes use of the anticipatory genitive, understanding the line as "If the troops of my king are commanded to camp" (and again in l. 10). For a parallel construction see Zólyomi 1996: 34 ex. 10.

9. For ^{kuš}a-ĝá-lá keše$_2$-da, "tied leather bags," used to designate provisions for travelers, see Heimpel 2009, 310.

11. Three manuscripts (N2, N40, N88) have su$_8$-ge, the plural stem of gub, while the other two (N35, N78) have su-bé, plural of ĝen. The intention of this line is that the captives are to be sent elsewhere. My translation is based on the common use of gub/*izuzzu*, "to stand (in service)." While ĝen is not normally used in this way, *alāku* can mean "to serve, do service," and is used in OB texts in reference to soldiers (CAD A/I mng. 3c. p. 309).

(2)Say (1)to Sîn-tillati, the frontier commander, (3)thus says Iddin-Dagan, your king:

(4)Thanks to you, my expeditionary force can (now) cross from one bank of the river to another. inspiring fear and causing a blockade. (5)When you went upstream to Kakkulatum, (6)(the gods) Lamma, Dagan, Kabta (and) Enlil caused the (enemy) troops to submit.[24] (7)My splendor covers the homeland, (8)while you approached the enemy land with your heroism and your strength.[25] (9)You have been able to make prisoners of the enemy.

---

[20] Var (X8): ^{d}lamma ^{d}da-gan ^{d}kab-ta erin$_2$-bi saĝ-bi-šè sá íb-dug$_4$-ga.
[21] Var (X8): ù za-e nam-kala-ga-ĝá-zu nam-ur-saĝ-ĝá-zu kur-bi-šè ba-e-te.
[22] Var (X3): ugnim-bi šu-za sá-dè Var (N88): ug[nim ...] sá-dè-/zu\.
[23] Var (Ur11, X8): ugnim(-bi) te-a nam-ba-lá-e.
[24] Var (X8): Lamma, Dagan and Kabta took possession of all these troops.
[25] Var (X8): and you, who knows my strength and heroism, approached the enemy land.

(10)After (that) man's troops have left the city, (11)once you have inspected the army, (12–13)then let go of the lowest (ranking) in order to safeguard their (other) prisoners.[26] (14)Let those who enter and leave (the city) work!

(15–16)Their famous kings and armed forces were brought in your path, (17)do not diminish your army![27] (18)Come quickly! (19)It is urgent!

Commentary

Unfortunately the surfaces of the two tablets (N90, X8) that preserve the majority of this text are very worn. While I had access to N90, I was able to read X8 only from photographs taken under poor conditions. Moreover, in ll. 5–11, for which N90 and X8 are the only sources, each text seems to have its own version. The eclectic text primarily follows N90 except in ll. 10–16, which are broken in the Nippur manuscript.

4. saĝ—gi$_4$, "to block," is well attested (Falkenstein 1964, 54; Civil 1964, 4; Karahashi 2000, 136f., Schramm 2001, 67; van Dijk and Geller 2003, 100; Hermann 2010, 230). The ability to cross both banks of the river must imply that Iddin-Dagan's forces control the whole river. The reason for X8's omission of this line is unclear.

5. Compare SEpM 2:4.

6. gú—ri, literally, "to bend the neck" is elsewhere unattested as a synonym of the more common expressions signifying the act of submission, gú ĝál or gú ĝar.

11. igi—dug$_4$ in the sense of igi—du$_8$ is attested in Cavigneaux and al-Rawi 1993, 178 l. 20 and Farber and Farber 2003, 102 11 18 (?) and iii 6'. Attinger (personal communication) suggested the reading šu-za sá-dè (N88, X3) for šu-za sá <di->dè, perhaps the result of haplography. For šu sá—dug$_4$ see Attinger 1993, 640.

[26] Var ll. 11–13 (N88, X3): Release the lowest (ranking) of their army that you took hold of. (*Note X3 omits line 12).

[27] Var (Ur11, X8): Approach their army, do not tarry!

12–14. The idea being there were too many prisoners to effectively guard them all, and so the lowest ranking were allowed to enter and leave the city for work.

13. Compare SP 2.42, Dialogue 2:95 and Dialogue 3:9 for a-ga-aš gi_4, an insult among scribes (Alster 1997, 364).

14. kíĝ bar(-ra) is attested in Ur III administrative documents (e.g. MVN 21 132:4; TENS 24:2f.; UTAMI 3 1935:2) with the verb gub, and seems to involve a type of work associated with earthworks (Attinger, personal communication).

16. ka-ĝiri_3 is an unusual word in Sumerian literature, attested elsewhere only in In.šag 118, Lu-diĝira 5, InstrŠur 16, Michalowski 1981, 388:1. In these instances, it is always used literally to refer to a physical path. Elsewhere, it is attested in Ur III documents (e.g. HLC 148; MVN 6 547), and in the personal name ^{d}inana-ka-ĝiri_3-^{d}šu-suen (Sallaberger 1993 103 w/n. 458; Such-Gutiérrez 2003 191f. w/n. 803). See also Gregoire 1975; Turner 1981, 101, 467 n. 25. For the use of the term in early OB Isin see van de Mieroop 187, 142 and BIN 10 p. 31.

17. "Do not diminish your army," in the sense "do not let your army down." Alternatively, "do not alter (the course/the assignment) of your army." For lá used in the sense of bala compare CKU 14:27.

18. For ĝá-nam-ma, "come!," see e.g. Wilcke 1969, 172; Cohen 1973, 298; Krecher 1978, 39f.

(1)Say to my king, (2–3)thus says Nanna-ki'aĝ, the frontier commander, your servant:

(4)Edana has turned against my king. (6)Atta-mannum brought (5)a 600 (man) army of Gungunum into Edana. (7)(But) I prevented that army from entering the old upper city. (8)So they camped in the new city.

(9–11)That army (of Gungunum) came from the bank of the Amar-Suena canal in order to build brick(works), fortify Dunnum and dig a canal. (12–15)If my king does not issue NIM-weapons, bows, arrows, small boats including their fishermen (and) their provisions, weapons (and)...—the arms of battle—(16)that army from the bank of the Amar-Suena canal (17)will continue building with brick(works), fortifying Dunnum and digging canals. (18)May my king not be negligent! (19)It is urgent!

Commentary

4. For the reading of the name Edana see Michalowski 1989, 89f. Frayne 1992, 33f. places the site along the Iturungal canal, the main

connection between the Tigris and Euphrates (see the map in Adams 1972, 36 fig. 17).

5. ugnim is almost never preceded by a number (but note CKU 20:33). Here the idea must be 600 men and not 600 armies.

6. The name, Atta-mannum, literally "who are you?," is otherwise unattested, although names beginning with the element *atta* or the interrogative *mannu* both occur (Stamm 1939, 129f., 237ff.). Here the name seems to be a scribal joke, perhaps deliberately intended as an insult.

7. For saĝ-an-na qualifying the upper part of a field see Civil 1994, 125. In a Nippur forerunner to Hh XX–XXII, this is contrasted with a-šà-ambar-murub$_4$, "middle of the field at the swamp" and a-šà-ambar-ki-ta, "lower side of the field at the swamp" (OB Nippur forerunner to Hh XX–XXII 113–115 = MSL 17, 100).

That X8 omits ll. 7 and 8 is best explained as an error of haplography, since l. 9 begins the same as l. 7. Ur1's omission of l. 7, but not l. 8, is less clear but may reflect an alternate interpretation of this passage.

8. Although it is tempting to read iri ki gibil, "new lower city," in contrast with "old upper city" in l. 7 this is unlikely given SEpM 5:11. Moreover, when iri^{ki} gibil is listed among the cities in the OB forerunner 5 iii 10' to Hh XX–XXIV (MSL 11 139), it is followed by the entry for iri libir making it unlikely that ki was anything but a determinative. That the determinative is present in l. 8 and not in l.7 may indicate the scribe's familiarity with the lexical tradition.

9. While Frayne 1997, 240ff. drew the Amar-Suena canal as connecting the western branch of the Euphrates to the central, or Iturungal, branch, Steinkeller 1991, 57 n. 142 demonstrates that this cannot have been the case, although a canal of such name did lie in the Umma province.

10. It is unclear whether du-un-nu-um ak-dè refers to the fortification of a specific city or to the construction of fortifications in general. Frayne 1992, 32 considered that the construction of the site of Dunnum was an anachronistic reference to Gungunum Year 22, in which Gungunum is said to have built Dunnum and the Išartum canal. Frayne 1992, 31 identifies Dunnum with the city of Dulli/Dunni-edin situated

on the Iturungal canal slightly east of Nippur.[28] The manuscript tradition shows that individual students (or their teachers) interpreted the line differently; N78 clearly marks du-un-nu-um with the geographical determinative ki, while X8 does not.[29]

12. In the context of ll. 12–14—a list of supplies qualified in l. 15 as á mè, "arms of battle"—NIM should be a type of weapon. Alternatively this could refer to a weapon preferred by Elamite soldiers as N75 implies. While weapons are not elsewhere specified as being of an ethnic group, note the ethnic qualification of an agricultural tool in e.g. YOS 2 17:10 (Stol 1981, 12). For ĝiš^{pan} ĝiš$^{\text{gag-pan}}$ see Civil 2003, 50ff. On weapons in general see Schrakamp in preparation and also 2009a; 2009b, 2009–10, 2010a, 2010b.

15. á mè, literally "arm of battle" occurs as an epithet of a specific weapon in a number of Sumerian literary texts (e.g. Angim 144, LSUr 383, Lugalbanda II 406). The term is unattested in administrative texts.

18. This line may be intentionally disrespectful given that SEpM 4–5 are supposed to exemplify a failed relationship between ruler and ruled (Ch. 2.2.1). For še-bé-d(a) / še-ba-e-d(a) see Falkenstein 1957, 162; Cavigneaux 1976, 42; Maul 1988, 445; Sjöberg 1998, 356.

---

[28] ANL 3 may provide further clues as to the location of Dunnum. According to l. 3, the city of Dunnum lay on the bank of the Amar-Suena canal. Since Steinkeller has shown that Frayne's placement of this canal is not correct (see above l.9), if this letter is to be believed, his placement of Dunnum would also be faulty. However, while it is likely that SEpM 4 and ANL 3—both of which place the city of Dunnum in the vicinity of the Amar-Suena canal—are talking about the same site, this need not have been the case. A number of other cities by the name of Dunnum are known from Old Babylonian period, although all are located much further to the north-west (Heimpel 2003, 608; Charpin 2004, 358 n. 1868).

[29] In Ur1 while the beginning of the KI is clear, it is unclear what follows. It may have been that the KI was to be read /ke/. For the writing ke of the verb ak in non-finite *marû* forms in OB literary texts see Attinger 2005, 62. Note in particular that his references are from Ur. This writing is also attested elsewhere in the SEpM corpus, see for instance SEpM 18:15.

SEpM 5. Lipit-Ištar to Nanna-ki'aĝ *(B5, 3.2.4)*

1. ^{md}nanna-ki-áĝ ra-bi-sí-kà-tum-ma

(2)Say (1)to Nanna-ki'aĝ, the frontier commander, (3)thus says Lipit-Ištar, your king:

(4)I, the king, sent you a letter about the enemy troops.[32] (5)Atta-mannum is someone doing well by his king. (6)He is a better servant to his king than you! (7)Why is it that without me knowing it you have not been obliging your king?[33]

(10)Now, I am sending you post-haste (8)2000 spearmen, (9)2000 bowmen (and) (10)2000 axe-men. (11)The enemy is camped in the new city—(12) chase them from their positions! (13)They are still carrying out the work, so it is the case that you have not obeyed (me!).

---

[30] Var (X5): mu lú-kúr-ra-ke$_4$ ù-bí-zu szu bí-[ta]ka$_4$-a.

[31] Var (X5) has instead:
7A. a-na-aš-àm erin$_2$ šu šà-šè ì-ĝál-a-ĝ[á] nam-lú-ulu$_3$-ba li-bí-ĝar.
7B. ne-eš erin$_2$ mu-un-ĝá-ĝá-e.

[32] Var (X5): I sent word after you informed me about the troops.

[33] Var X5: ^{7A}Why is it that the troops there that are under my authority have not been stationed among the people? ^{7B}Now he (= Atta-mannum) is stationing (his) troops there!"

(14)Put guards on all the individual cities from their border up to yours. (15)Do not let that city out of your grasp! (16)Set your soldiers there! (17)It is urgent!

Commentary

7A & B. The scribe of X5 replaced l. 7 with two additional lines, perhaps indicating his confusion with it. In so doing, however, he altered the stress of the letter. In the Nippur recension l. 7 only reinforces Nanna-ki'aĝ's general incompetence. In X5 the additional lines emphasize what it is that Nanna-ki'aĝ failed to do, namely infiltrating the general populace with his own men. The Nippur version alludes to this only in l. 16.

7A. Here šà-šè is best understood as the Akkadian expression *ana/ina libbi*, "therefore, therein, therefrom." This solution is difficult and it is tempting to amend the text to read šu zu!(ŠÀ)-šè in light of CKU 20:37:

ù za-e erin$_2$ šu-zu-ta ì-ĝál-la
"and as for you, with the soldiers who are under your authority (get the trench dug!)"

For adverbial expressions inserted between a verbal root and its nominal component see e.g. Karahashi 2000, 37.

10. The dur$_{10}$-tab-ba is an ax with a normal blade on one side and between three to five spikes on the other (Alster 2004, 30; for its identification in archaeological contexts see Civil 1987b, 22f.). It is associated with fishermen/hunters in both literary and administrative texts. For example, in InGd, Inana's fisherman/hunter uses the ax to kill Gudam. Lugalbanda II 146 compares the power of Lugalbanda's arrows to the dur$_{10}$, a knife used to kill fish. In the Mari text ARM 1 31:37 fishermen deployed as soldiers are sent out with their axes. In ARMT 23 384:3, bronze ingots are designated for fishermen's axes. Given Nanna-ki'aĝ request for fishermen's boats in SEpM 4:13, the battle-axers in this line may have been fishermen. Although the army promised in ll. 8–10 seems large, the number is likely stylized to counter Attamanum's army of 600 in SEpM 4. (Compare also the size of armies mobilized in the Mari archives, Abrahami 1992. See also the references listed in Heimpel 2003, 599ff. However, while troops in the Mari texts are tabulated by city of origin they are never subcategorized by weapon of expertise).

Elsewhere, in Sumerian literary texts, sar normally has the meaning "to run" and occurs primarily in the context of running or chasing away (e.g. Lugalbanda II 48, LSUr 86). The nuance intended here, however, best fits the meaning of *hummuṭu* and *šuhmuṭu*, "to send quickly, promptly," attested in OB and said of particularly of troops in Amarna; CAD H, 62f.). Alternatively, sar may be from *šaṭāru*, "to assign," used in OB letters for assigning soldiers to military service (CAD Š/II, 237f.).

The verbal prefix im-mu-e-ši- is rare in Sumerian literature, but attested in OBGT VII (MSL 4 88ff.) In OBGT VII -e-ši- is used for second person singular ventive suffixes *-kum* and *-akkum*, to indicate direction "towards you" with verbs of motion (Black 1984, 20f.). For im-ma- going to -im-mu- before -e-ši- see Black 1984, 24.

11. A reference to SEpM 4:8 in which Nanna-ki'aĝ informed Lipit-Ištar that Atta-mannum's army is camped in the new part of Edana.

13. ll. 10 and 12 use the verb sar with clearly different meanings, and ll. 7 and 13 do likewise with the verb šu ĝar. Perhaps one of the purposes of this exercise was for students to practice using the same vocabulary in varied contexts. According to Civil (2005, 35) na- in the second verbal chain should be negative of the deontic, indicating negative advice. Contextually, however, the prefix must be the negative epistemic.

[40] Uk2 gloss: Say to my king who is like a sparkling-eyed bull.
[41] Uk2 gloss: statue of gold, born on a favorable day.
[42] Var (Ur4): You command is the word of a god, all the lands cannot reverse it.
[43] Var (N87, Ur4, Uk1, U2): Has my king investigated my case? I am a citizen of Ur!

Commentary

1. For the reading sum_4 for su_6(KA*SA) cf. Proto-Ea 319 (MSL 14, 44) which lists sú-um: KA*SA. That Utu is the king to whom Ur-saga appeals is almost certain given that elsewhere in the Sumerian literary corpus, sum_4 ^{na4}za-gìn lá is used primarily in reference to him.[44]

4. Elsewhere in the Sumerian literary corpus the áb-za-za is attested only twice: in the list of animals that Inana supplies for the city of Akkad at the beginning of CA 21f. and the list of animals Enlil brings to Sud as wedding gifts in EnlSud 108. This animal occurs several ti,e in Ur III administrative sources as well, for instance in a list of offerings of bulls, sheep and deer (AnOr 7 no. 154) and once as an object made of lapis (UET 3 415). For the identification of áb-za-za see most recently Attinger 2009, 140, who identifies the creature as a wild buffalo.

The term amaš is normally reserved for a sheepfold, in contrast to the (é-)tùr, "cattle pen" (e.g. IšD J 21–22; EnmEns 209). While gazelles (e.g. DuDr 234, 238, 239) and goats (e.g. EnmEns 185) are elsewhere attested living in an amaš kù-ga, to find a bovine dwelling in an amaš of any type is uncommon.[45]

The translation of pàd-da with *wa-tu* instead of *nabû*, is perhaps surprising. Although *atû* is attested in the sense of divine selection, the references listed in CAD A/II 519f. and Seux 1967, 368f. are all from the first millennium. In contrast, *nabû* is attested in OB royal inscriptions (CAD N/I 36; Seux 1967, 175).

The omission of this line in three (of nine) manuscripts was perhaps the result of haplography.

---

[44] See the references collected in Sjöberg & Bergmann 1969, 87; Polonsky 2002, 209–213. Of course it is also possible that Ur-saga was addressing the king of Ur. For references to Ur-Namma, Šulgi and Šu-Suen adorning the lapis beard in ritual contexts cf. Polonsky 2002, 516–17. In such instances the beard served to equate the king with the sun god, emphasizing his role in justice (Ibid., 518–19).

The epithet gud igi gùn is attested elsewhere only in reference to Nergal (STVC 73, 5; Heimpel 1968, 145). Given the plea for justice that this letter contains, however, it is most likely that Utu—or a king acting in the capacity of the sun god as the administrator of justice—was the intended recipient. Note, however, that the reference to Angim in l. 6 invokes Nergal. The ambiguity may have been deliberate.

[45] Note, however, the balaĝ lamentation am-e amaš-a-na, "the bull in his fold" (cf. Cohen 1988, 152ff.), although the incipit is not preserved in the OB manuscript.

5. The form ^{d}inana-ke$_4$ in X9 indicates the scribe did not understand the meaning of the line within the context of the text as a whole, although it is technically correct in isolation.

6. This line is perhaps a reference to the opening line to Angim, an <-gin$_7$> dím-ma dumu ^{d}en-líl-lá, "created like An, O son of Enlil."

7. For hur + negation, "never," see Cavigneaux and Al-Rawi 2000, 37.

8. The choice to read ĜÁ as ĝá or ĝe$_{26}$ is problematic. Volk argues that the forms B-a-gin$_7$ and B-e-gin$_7$ are not interchangeable.[46] The choice to read ĝe$_{26}$ here emphasizes the continual action.[47] The reading du$_{12}$-du$_{12}$ for TUKU.TUKU is established by OB Diri Nippur 49–53, 53a, which gives both translations *ahāzu* and *rašû*. The orthographic variant dù-dù in X9 confirms this.

10. As is frequently the case in the Sumerian epistolary corpus, bar èn tar is best understood in the sense of Akkadian *arkatu parāsu*, "to take care of (person or situation)," used primarily in OB letters, or "to investigate (a judicial or political matter)" (see further Michalowski 2011, commentary to CKU 5 l. 27/29). Alternation between a negative (èn li-bí-in-tar) and a positive (èn bí-in-tar) as a rhetorical question, intended sarcastically, is not uncommon (e.g. CKU 2:29).

11. tukum-bi…an-na-dùg, "if it is satisfying for him" adhere to the expected Akkadian expression with *ṭabu* (CAD ˘ 34ff; Civil 1994, 182 and 2005a, 247; Böck 1996, 10). As in Uk2, the expression is normally with an-na-kam, "(if) it is a 'yes' for him."

---

[46] The only instance where the forms R-a-gin$_7$ and R-e-gin$_7$ alternate in different manuscripts of the same line appears to be in ELA 270, where lá-lá-a-gin$_7$ occurs as a variant for lá-lá-e-gin$_7$. Here, however, the variant—a- is clearly influenced by concerns of vowel harmony.

[47] The variant in X9, še-ĜÁ-NE-gin$_7$, is particularly problematic. Here ĜÁ must be read ĝe$_{26}$ as a form B-ade is never attested. B-ede, however, "in order to X," does not fit the context. Assuming an original form B-eda in which a shifted to e under the influence of the e vowel in the root, is also problematic as it is not clear what the locative -a would represent. As such, this variant seems to indicate that the scribe did not understand the Sumerian and perhaps conflated the participial form with the pronominal conjugation.

SEpM 7. Lugal-šú to a king *(B7, 3.3.2)*

(1)Say to the king whose brilliance shines forth like the moon over all the lands: (3)Repeat (2)to the king who renders just verdicts like Utu, effecting decisions like Ištaran. (3)to my king who hears prayers: (4)Thus says Lugal-šu,[50] citizen of Nippur, your servant:

(5)Like a sheep, grazing became my lot,[51] (and) I finished by rubbing (myself) down. (6)Like an ox bound to a yoke it cannot support, I have been sent to the desert. (7)Like a cow whose calf is not by her side,[52] I

---

[48] Var (N13): ^{m}lugal-nesaĝ-e.
[49] Var (X2): ^{ĝiš}má gi-na-a li-bí-ib-kar-a.
[50] Var (N13): Lugal-nesaĝe.
[51] Lit: "My mouth eating grass like a sheep appeared to me."
[52] Lit: "like a cow whose calf is not tied next to her."

cry plaintively. (8)Like a ewe whose lamb is seized in the feeding-pen, (my) hands are tied. (9)Like a bird, I was snatched in my nest. (10)Like a boat that did not *take refuge* at a stable dock,[53] the wind has cast me adrift.

(11)In the streets of Nippur, sorrow consumed me. (12)A foreign city has entered into my city. I had no protector. (13)A foreign house has entered into my house. It exercised authority over me. (14)In my city, like a slave, I did not carry silver. Dirty hair hung (from my) head.[54]

(15)My friends, companions, acquaintances and dear ones (16)looked contemptuously at me like (at) a man who eats alone. (17)My birth mother, whose breasts are (like?) crescents, (18)took my consumption of milk from my mouth (as I sat) in (her) lap. (19)My father, who raised me in his lap, cast me away.

(20)My merciful lady—her temple is precious!—no longer notices me. (21)Like a bad tree which has born no fruit, no one rejoices over me. (22)I am a shoot with no off-shoots, thus I do not want to be carried off!

(23)May my king consider my case and return me to my rightful position!

Commentary

1. While the image of shining like the moon light (iti$_6$-gin$_7$ è) is common, it is not otherwise attested with the compound verb pa è nor is the moonlight ever said to shine over the kur-kur. As iti$_6$-gin$_7$ è is applied to numerous deities (e.g. Nergal, Inana) it is unclear to whom this epithet here refers.

2. The first epithet—^{d}utu-gin$_7$ di si sá kud-kud-dè—is attested in OB royal hymnology (Šu-ilišu A 30, IšD A+V 226, Ur-Ninurta A 35). The second—eš-bar ^{d}ištaran-gin$_7$ si sá-sá-e-ra—is more unusual. eš-bar occurs with the verb si sá only in one Rim-Sin royal inscription (Rim-Sin I 135 = RIME 4.2.14.17) and in two lamentations (CLAM 98:54,

[53] Lit: "like a boat that was not held back (tak$_4$) at a stable dock."
Var (X2): "a boat not firmly secured (kar)."

[54] Lit: "In my city, I do not go around like (someone) free of claims. The hair of (my) dirty head is hanging down."
Alternate: "In my city, I go around unclean like a slave…"

350:54). Although Ištaran is never said to make an eš-bar, compare Gudea Cyl. A Col. X ll. 24–26:

> é-bar$_6$-bar$_6$ ki á-áĝ-ĝe$_{26}$-ĝá
> ki ^{d}utu-gin$_7$ dalla-a-ĝá
> ki-ba ^{d}ištaran-gin$_7$ di iri-ĝá si ba-ni-íb-sa-e
>
> "In the Ebarbar, the place where I issue orders,
> the place where I shine like Utu
> I justly decide, like Ištaran, the lawsuits of my city."

3. The epithet šùd-dè ĝiš tuku is well attested in OB royal inscriptions and hymns, in reference to various deities including e.g. Suen, Nuska, and the goddess Ninibgal.

4. See 2.4.1 for discussion of Lugal-šu and the variant Lugal-nesaĝe.

5–12. Ll. 5 to 12 contain similes used to illustrate the sender's unfortunate circumstances. Ll. 5–11 draw on animal imagery to describe a person who has lost his way while l. 12 is that of a ship cast adrift. Such images are expected (see Black 1998, 157 who demonstrates that almost one-third of the imagery used in Lugalbanda II comes from the animal world; while seven percent—the third largest category of image types in Lugalbanda II—are of boats). If the images themselves are not unusual, the verbs used with them are. Moreover, there does not seem to be a discernible reason for the choice between *hamtu* or *marû* forms.

5. udu-gin$_7$ ka ú gu$_7$, "like sheep eating grass" is a common topos in Sumerian literary texts (see the examples collected by Heimpel 1968, 223f.), used for instance to describe the primeval conditions in which humans lived before the gods created sheep and grain (EG 24, HGCS 1). In SEpM 7, the sender is shocked to find that he has reverted to the behavior of his primitive ancestors. The figurative use of pàd is paralleled only in SEpM 8:9. In both instances, -e- is the first person singular locative (Attinger, personal communication; see also Attinger 1999; 2000) rendering a literal translation "it appeared to me."

naĝa dúb, "to rub with soap" (Attinger 1993, 621 §656; Alster 2005a, 67), is fitting here as it applies primarily to animals (e.g. SP 2+6 79 and 5 14). Although unprecedented in this context, the reading of the final verb as til is favored by the variant tìl in X12.

6. The image of an ox under a yoke also occurs in UrN C 10, which Flückiger-Hawker (1999, 221) interprets as an image "of a single bull straining because bulls are usually yoked in pairs."

7. For the common motif of a mother animal who has lost its young, attested as early as a Lugalzagesi royal inscription (SAK 154 II 43–45) see Heimpel 1968, 183; Tinney 1996, 144 (comm. l. 68). For gù dug_4, often said of animals, see the discussion in Attinger 1993, 526ff. Note in particular the frequent use of the infix -m- with this verb to focus attention on the object or occasion that is causing the subject to cry out (Ibid. 531 §458; Woods 2008, 198f.). While gù is often modified by an adverb, it does not occur elsewhere with arhuš. For the adverbial marker—a see Attinger 1993, 169 §105c.

8. Although there is no direct parallel for this image, the following passages are comparable: LSUr 301, LUr 66, SP 3.116, YOS 11 70 ii 23'. For the common use of ewes and lambs together else in Sumerian metaphorical language see Heimpel 1968, 232ff (14.6–14.10; 15). The é-ubur is a purely literary term, unattested in Ur III administrative documents. For šu dab_5, in the sense of "paralyzed hands," see Alster 2007, 107. While this interpretation makes the best sense contextually—i.e. Lugal-šu is powerless to stop what is befalling him, like a captive animal whose young is taken from it—the variant šu-ni (N14, N85) is difficult to explain.

9. For the syntax of this line see Heimpel 1968, 39f. Parallel sentiment is described in TCL 16, 46:4–5 (Heimpel 1968, 385 ex. 57.10).

For šu-ba-ni-in-ti in comparative sense see e.g. DuDr 60 & 62 (sources O, J^1, R^1; see Attinger 2009c for sigla) and SP 5.72B.

10. For ba- + dirig see Woods 2008, 252f. The image of a boat cast adrift occurs in DUrN 182.

11–19. Note that the complaints in this passage are made in the perfect, marked explicitly in l. 16 (mu-gíd-eš) and l. 19 (ba-an-ĝar-re-en).

11. While i-si-iš is both a manifestation of joy and sorrow, the second meaning was obviously intended here (see further the discussion in Jaques 2006 163, 165). For i-si-iš gu_7 see Jaques 2006, 372 w/n 796. While the lack of an ergative marker on i-si-iš and the variant in N76 argue in favor of a translation "sorrow in the streets of Nippur consumed me," the sense would be problematic.

12. Here lú èn tar is used as Akkadian *pāqidu*, "protector," in place of the more common sag èn tar.

13. For é kúr compare LUr 291, 295. DUN in the sense of "to be/put under the authority of" follows a suggestion of Attinger (personal

communication) with reference to Cavigneaux 2006, 19 w/n. 28 ("to enter or be in a relationship with someone"), and the term lú-DUN-a, "subordinate" (Attinger 2003, 31; Maiocchi 2009, 239). Literally, then, "it had a relationship against me."[55] The variant du_{11} in X12 supports the reading du_{24} (DUN) suggested by Civil 2010, 163.

14. For siki saĝ, "head hair" cf. InDesc 235 and DI T 14. For siki lá, as a description of wearing one's hair loose or hanging see RS B 8 and DI C 11. For uncleanliness as a description of suffering compare CKU 5 ll. 20f.:

> iri-ĝá túg dàn-na mi-ni-dúr-ra túg mu-dur_7-ra ba-mu_4
> lag-e a mi-ni-íb-tu_5-tu_5-a sahar igi-ĝá ba-e-gub
>
> "In my own city, where I used to dwell in fine clothing, I am forced to wear dirty rags. Forced to wash in clods of dirt, there is dirt on my face."[56]

For unclean hair in particular see Sag B 97 (MSL SS 1, 31): sag-siki mu-dur_7 = *ma-lu-lú*. The reading dur_7 is now assured by the variant /mu\-du-ra in InDesc 341 (MS 3282, courtesy K. Volk).

15. In other words, "everyone." Compare SEpM 19:15.

16. The idea is reminiscent of that from the Akkadian story of the Poor Man of Nippur ll. 17–20, in which the protagonist is afraid to slaughter a goat in his yard without provisions to feed his neighbors, lest they see him eating alone and (falsely) accuse him of greed.

17, 19, and 20. The possessive suffix -bi- in these lines should be -ni-. Confusion of the person/non-person pronouns occurs also in the pronominal prefixes in ll. 12–13 and ll. 19 and 23.

17. To my knowledge there are no parallels for the image of crescent-shaped breasts, although DI P Seg. B l. 21 compares Inana's vulva to a crescent moon. Theoretically ll. 16 through 20 should go together: my friends did this, my mother did that, and my father did that. The qualification of the mother's breasts here in l. 17 is a poignant intensifier of the complaint that follows.

18. Although du_{10} could be an adverb, "my contented consumption of milk," beginning a line in this way is unusual. As such, it seems that

---

[55] Although ugu-ĝá-aš for ugu-$ĝu_{10}$-šè is rare, it is not unattested (Attinger, personal communication).

[56] Translation following Michalowski 2011.

du_{10}-ge-eš is not the adverb "well" but the noun du_{10}, "knee." While du_{10}, "knee," is normally attested with a /b/ auslaut, there are a number of cases in which final /b/ and /g/ alternate (Civil 1973, 60f.). That the lap was the location the child was placed in order to suckle see Volk 2004, 84 n. 80. This solution requires some reconstruction, but the image contrasts well with that of l. 20.

20. arhuš is not otherwise attested qualifying nin, although plenty of goddess are said to be merciful (Inana, Ninmah, Nungal).

The sufferer's complaint has thus far been expressed in the perfect tense, yet with l. 20 the complaints switch to imperfect forms. The variant ending—en in N47 can be explained by -en in place of -e 3rd sg. in *maru* forms (Attinger 1993, 112 §41).

21. Other instances of ĝiš hul in Sumerian literature are uncertain, although the passage in ŠB 57 seems to refer to a specific type of plant. The tree is unattested in the lexical tradition. Here, at least in part, ĝiš hul must have been chosen to pun with húl. For -ma-ši-húl see Warad-Sin 27.46. Here the terminative refers to the misfortunes referred to in the preceding lines (Jaques 2006, 320).

22. The normal image is positive: a seed with sprouts is one that is fertile (e.g. Keš Hymn 58L). In this line, however, the image is of a tree from which nothing grows, implying that the sufferer has no descendants. The semantic distinction between gibil and isimu, both of which are glossed as *pi'ru*, is unclear (Veldhuis 1997, 152). For /na/ as a negative cohortative see Attinger 1993, 290f.; Civil 2005b: 35.

23. ki-mu-šè gi_4 is expected. For ki-ùr in the sense of social status or position note the use of Akkadian *išdu*.

SEpM 8. Lugal-nesaĝe to a King *(B8, 3.3.3)*

1. lugal ^{d}utu-gin$_{7}$ šà kalam-ma mu-un-zalag-ga
2. ù-na-dug$_{4}$
3. i-^{d}utu ab-sín íb-ta-an-zi-ga
4. ti-id-nu-um^{ki}-e šu bí-in-ĝar[57] šibir-bi mu-un-dab$_{5}$-ba
5. lugal idim-bi-šè ab-šid-dè-a

24. sa$_{6}$-ga-ĝu$_{10}$ hul-šè mu-da-an-sig$_{10}$
25. lugal KA /x x\ bala-ĝu$_{10}$ ^{d}utu-gin$_{7}$ ha-ma-dirig

(2)Say (1)to the king who brightens the heart of the homeland like Utu. (6)Repeat to the one (3)who removed oppression from the furrows, (4)who caused Tidnum to submit,[59] who seized their (royal) staff, (5)the one counted as their important king. (7)Thus says Lugal-nesaĝe, citizen of Nippur, your servant:

(8)My inexplicable punishment makes me glower. (9)Wailing in distress became my lot. (10)In a city that has become hostile I have been moaning

---

[57] Var (N20): šu bí-in-dab$_{5}$.
[58] Var (Ki1): ug$_{5}$-gin$_{7}$ ki túm-túm-mu nu-zu še-gin$_{7}$ àr-[…].
[59] Var (N20): "who defeated Tidnum."

like a dove, (11)(but) no one took pity (on me).[60] (12)I am filled with restlessness, like a dog that does not know a place to rest. (13)I am on alert like a bird flying from the grasp of a falcon. (14)Like a garden that has not been watered, my joy withers in fetid (decay).

(15)The glances (of those within) the palace of my king silenced me; a bad reputation has been attributed to me. (16)…moaning…(17)…cries of woe…(18)Like an ox I licked my fodder (with my tongue), like a pauper I grasped about rapaciously. (19)My young fledglings, dazed in their nest, opened wide their mouths to eat some food. (20)Gusty winds from the…desert, like…, seize me(?) in…

(21)Dead but unburied,[61] I am ground up like grain,…(22)My brother (even though) he is not a stranger looked at me contemptuously. (23)… I hung my neck downward. (24)My good has been made evil.

(25) May the…king, like Utu, make my *appeal* successful!

Commentary

1. The use of eme-sal ša-ab for šà in N67 is unclear. That the king in question was perhaps Enlil-bani see Marchesi 2006b, 18 n. 69.

3. For i-^{d}utu see Cooper 1983, 31; Attinger 1993, 564f; Edzard 2003, 169. The line compares with PBS 5, 74 vi 22–vii 6 (Frayne 1990, 87–90), a royal inscription of Enlil-bani (Marchesi 2006b, 18 n. 69).

4. The use of GÌR.GÌR as a logogram for Tidnum in OB texts is discussed by Steinkeller 1992, 262ff; Marchesi 2006b, 124. This text can now be added to his list of attestations (Ibid., 263 n. 60). Outside of the CKU, Tidnum as the enemy occurs only in LN 231; LSUr 256, 488; Šulgi U 25 (and see most recently Marchesi 2006b, 9–26). Note also the use of kur GÌR.GÌR occurs as a variant of lu_5-lu_5-bi in InEb27. For the locative-terminative nominal suffix -e used to mark the second subject of a causative verb see Attinger 1993, 198 §129b: Zólyomi 1999: 242.

The translation of šu ĝar here is implied by context. Marchesi (2006b, 18 n. 69) translates literally "to set the hand to." šibir dab_5 as a symbol of royal authority occurs also in Sin-iddinam E 13, Rim-Sin C 22 and Samsu-iluna C 5.

---

[60] Alternative: "But no one accepted my supplication."
[61] Var (K1); "like a dead person who has not experienced burial.

5. idim is not a common word in Sumerian literature, although it occurs modifying a range of subjects, e.g. Enlil (EWO 199), Enlil's word (Enlil A 143, 144), waves (Hendursaĝ A 28), Lipit-Ištar's name (Li C 5) as well as other deities (Ningišzida, Nuska, Gilgameš). -bi is here the collective referring to the land of Tidnum. For šid, "considered (lit: counted) as their important king," compare CA 154; DG 82f (Cavigneaux & al-Rawi 2000, N6 6'f., Meturan 121f.); Lugale 693.

7. See 2.4.1 for discussion of Lugal-nesaĝe and the variant Lugal-šu.

8. Sjöberg 1975, 226–7 collects the references for sul-a-lum and notes the variant translations with *ennittu*, "punishment" and *arnu*, "sin." Punishment best fits the context.

9. The reading til_4 for AŠ is provided by Izi E i 230 (MSL 13, 191). This word is rare in Sumerian literature occurring only in In.šag 163 as one of Inana's many traits enumerated there. For mu-e-pàd see SEpM 7:5.

10ff. Lines 10, 12, 13 and 14 use animal similes to illustrate the sender's unfortunate circumstances. This section parallels ll. 6–13 in SEpM 7 that draws heavily on animal imagery for the same purpose. These lines all make use of *hamṭu* forms, in contrast to the parallel lines in SEpM 7, which alternate between *hamṭu* and *marû*.

10. For $tum_{12}{}^{mušen}$, one of the most frequent bird names occurring in Sumerian literature especially associated with mourning and distress, see Veldhuis 2004, 289. In CA 219 doves are said to moan as an indication of the horrible fate that should befall Akkad.

12. si, "to fill," used figuratively for a person containing a particular trait, occurs also in a variant to Lu-diĝira 35:

> $^{ĝiš}kiri_6$ me-a (var: la-la) i-si-iš lá-lá-e (var: asil-lá si-a)
>
> "She is a garden of delights (var: of plenty), full of laughter (var: filled with joy)"

In reference to objects filled with human emotions (e.g. sorrow, joy) see e.g. LUruk 42; UrN B 26.

13. The image of a falcon preying on smaller birds is common (Veldhuis 2004, 282). While umbin is perhaps the word expected for "claw," šu is used specifically in reference to a bird's claw also in Nungal A 50 and Home of the Fish C 2, 4.

14. For a dug_4 see Attinger 1993, 477–484; Civil 1994, 69. For similar imagery compare LSUr 50.

Three sources for this line (N20, N43, N76) add šu-ta. Plants are watered "by hand" also in WS 110, HT 174. Certainly it is deliberate that all the nouns of the second half of the line are written with box-shaped signs: $asil_3$ (EZEN*A), háb (LAGAB*U), ug_5 (EZEN*BAD).

15. I understand igi-lá as the noun "glances" and not as an abbreviation of igi-tum-lá, "envy" or the like. For igi-lá as its own lexeme see most recently Attinger 2005, 230; George 2009, 95. For i_5-gar see Geller 2003 123f.; Jaques 2006, 285 n. 591. A similar complaint is made in Ludlul I 80–81: "If I walk the street, ears are pricked; If I enter the palace, eyes blink" (Lambert 1996, 34f.).

18. eme $šub_6$ is attested in proverbs, but is always said of animals, e.g. dogs in SP 2 107, 117; SP 5.82. SP 2.117, in particular, was specifically intended as a metaphor for human behavior, as it is used as a direct insult in Edubba B 161 (Sjöberg 1973, 139f., Alster 1997, 373):

> ur-gir_{15} ĝìš bír-bi eme $šub_6$-bé
>
> "the dog licks its shriveled penis (with its) tongue"

For said of lizards see e.g. Behrens 1998, 98 w/n. 171; Geller 2001, 235; Peterson 2007, 171, 264–8, 525. For šu ša-an-ša see Alster 1997, 420; Römer 2004, 160.

19. gùd is used figuratively also in LN 215, 270. Although zi gi_4 is normally "to be on good terms, to calm down." It can also have a negative sense, "to be silent, stupefied" (Jaques 2006, 216 n. 467 and clear in LSUr 104, for which see Attinger 2009b). Here the baby birds would be sedated from hunger.

20. The sense of the line is unclear. dili-bad (-rá), "visible" (e.g. Man&God 114; Lugale 110) does not seem to fit the context. é HAR-HAR could either be a "mill" (é àra) or, literally, "a house of debt" (é ur_5-ur_5; for which see e.g. Krecher 1966, 219; Civil 1993, 74 n. 10, Alster 1997, 430; Römer 2004, 150). Note that in SP 13.51 é ur_5-ur_5 can also refer to a woman who is in debt (Alster 1997, 430).

21. The motif of the "un-buried" occurs elsewhere in the literary corpus (e.g. GEN 305–6) and in incantations referring to unburied ghosts (e.g. Ni 630 l. 106' = Geller 1985, 143). SP 28.9 gives us a clue as to one sin punished by depriving the perpetrator of burial:

lú digir-ra-a-ni nu-mu-un-kal-kal lú-bi ki nu-tùm

"If a man does not treasure his god, that man will not be buried."

In MM 137f. the Amorites are mocked for not burying their dead:

ud tìl-la-na é nu-tuku-a
ud ba-ug$_7$-a-na ki nu-túm-mu-dam

"During his life he has no house and when he dies, he will not be buried."

Alster 1987, 59 suggests restoring the end of the line following EG 155:

^{na4}šu-šè bar-za-a ár-ár mi-ni-in-ak

"as if it were pumice(?) it makes your body into flour"[62]

25. Since Lugal-nesaĝe did not have a "reign" (bala), our line is surely a clever play on passages such as IšD A+V 84:

nam-lugal-la bala-ĝu$_{10}$ hé-bi-in-dirig

"he made my reign of kingship excellent."

While X8 seems to read lugal du$_{11}$-ga-ke$_4$, such a descriptor is otherwise unknown.

[62] Alster & Vanstiphout 1987.

30. ^{d}nin-líl tum-ma-al^{ki}-šè ì-DU-DU-en[63]

---

[63] The reading of DU-DU here is very problematic. Michalowski (2006, 149) interpreted the -NE- in N41 and N48 as -dè-, a graphic variant of -de$_6$-, but this is unlikely given that de$_6$ is "to bring something" while túm is "to bring someone" (Sallaberger 2004), and indeed this is what our text consistently has throughout. Moreover, N41 easily could read DU]-DU-NE-en and N98 DU-DU]-NE-en. The reading túm-túm (-ne)-en, however, is equally problematic. Regardless, I believe the sense is clear. The reduplication would indicate that the leatherworker performed this action on numerous occasions (Jagersma 2010, 321).

31. inim lú-^{d}inana ašgab gal ^{d}en-líl-lá-šè sar-ra
32. ^{d}iš-bi-èr-ra é-kur-igi-ĝál-la
33. ^{é}šutum ^{d}en-líl-lá in-dù

(1)En-me-barage-si, the king, (2)built Iri-nanam, Enlil's abode. (3)Agga, son of En-me-barage-si (4)made Tumal resplendent (5)(and) brought Ninlil into Tumal. (6)Then Tumal was abandoned for the first time.

(7)Mes-Ane-pada built Buršušua, Enlil's abode. (8)Mes-ki-aĝ-nuna, son of Mes-Ane-pada (9)made Tumal resplendent (10)(and) brought Ninlil into Tumal. (11)Then Tumal was abandoned for the second time.

(12)Gilgameš built Du-numun-bura, Enlil's dais. (13)Ur-lugal, son of Gilgameš, (14)made Tumal resplendent (15)(and) brought Ninlil into Tumal. (16)Then Tumal was abandoned for the third time.

(17)Nani built the magnificent garden of Enlil's temple. (18)Mes-ki-aĝ-nana, son of Nani, (19)made Tumal resplendent (20)(and) brought Ninlil into Tumal. (21)Then Tumal was abandoned for the fourth time.

(22)Ur-Nama built the Ekur. (23)Šulgi, son of Ur-Nama, (24)made the Tumal resplendent (25)(and) brought Ninlill into Tumal. (26)Then Tumal was abandoned for the fifth time.

(27)From the years of Amar-Suen (28)until the year Ibbi-Suen, the king, (29)chose En-am-gal-ana by extispicy as the high priest of Inana of Unug (=Ibbi-Suen 4), (30)I brought Ninlil to Tumal.

(31)Written according to the words of Lu-Inana, chief leatherworker of Enlil.

(32–33)Išbi-Erra built Ekur-igiĝal, Enlil's storehouse.

Commentary

For a detailed commentary of the personal names and cult places used in this text see Michalowski 2006, 155ff. With one exception, all the characters are known from other Sumerian literary compositions including SKL (Ibid. 159). Moreover, the kings represent the dynasties in the order in which they are presented in SKL: Kiš-Ur-Uruk-Ur-Isin, with the significant omission of Akkad. The first three cult places are only attested in literary compositions and lexical lists while the others occur in administrative documents as well. All occur together in the Nippur version of Proto Kagal (Ibid. 157ff). It is for these reasons that

Michalowski concludes "The context of [this inscription] is not history and royal legitimation, but the hermetic world of the Old Babylonian schools, detached from the real world by their employment of a long dead language (Ibid. 163)."

While the composition may have been intended as humorous, as Michalowski suggested given the profession of the speaker, within the context of SEpM, it takes on new meaning. Specifically, together with SEpM 1–8, the Tumal text serves to further the notion of Isin as the legitimate successors of Ur III (see further Chapter 2).

Oelsner 2003, 221f. provides charts comparing the variant verbal forms that occur. He also charts the use of determinatives with personal names.

SEpM 10. An Axe for Nergal *(5.7.3)*

16. a si-ga hu-mu-un-na$_8$-na$_8$

(1)Nippurtalu, (2)son of Lugal-šuba, the merchant, (4)fashioned a heavenly axe (3)for Nergal.

(5)Its wood of the *arganum*-tree of the mountain (6)is superior to the *alal*(-stone). (7)Its stone is *antasura*, (8)which has no rival.

(9)When he strikes (with it), may his arm never tire. (10)Should it break, (11)I will repair it for him. (12)Should he lose it, (13)I will replace it for him.

(14)As long as I lie may I be regarded (with benevolence). (15)When I die (16)may I drink clear water in the netherworld.

Commentary

For discussion of dedicatory inscriptions and their place within SEpM see Chapter 2.2.2.3.

1. The name nibru^{ki}-ta-lú is analogous to names such as ^{d}en-ki-ta-lú, ^{d}ba-ú-ta-lú, however, this is the only occurrence of which the divine name is replaced by a place name (Civil 1969, 180).

4. Alternatively, Wilcke (1969, 58 w/n 210 and 184) and, most recently, George (2003, 793) understand an-na as the metal. This interpretation would imply that an-ta-sur-ra in l. 7 was an ornamental precious

stone, for which see Schuster-Brandis 2008, 163f. and 172f. where it is mentioned among such objects.

5. That the ar-ga-nu-um tree comes from the mountains is attested also in Al 92.

6. The unexpected comparison of wood with stone prompted the editors of PSD A/I 105 to include a second definition of a-làl as a type of wood. Elsewhere, however, a-làl is always a type of stone. Moreover, there is no *a priori* reason that wood cannot be compared to stone, the idea being the wood was so strong that it is was superior to stone. The destiny assigned to the a-làl in Lugale 489–496 makes clear that it was a particularly strong stone. For a similar conclusion see Attinger 1995, 137.

7ff. N58 omits lines 7 and 8. That lines 6, 7 and 8 all end with the same sign suggest the omission was a result of haplography.

7. For the stone an-ta-sur-ra see Schuster-Brandis 2008, 395 and the OB Nippur forerunner to Hh XVI (MSL 10 57) in which an-ta-sur-ra is qualified by the determinative na_4. Stone axes continue to be found in post-Neolithic contexts presumably for votive purposes (Moorey 1994, 73). In particular note K107, an inscribed fragmentary stone axe from OB Nippur, cited in Ch. 2.2.2.3. A weapon of an-ta-sur-ra is attested also EWO 408 in which part of Ninmug's destiny specifies that she will carry the antasura blade. In Lu-diĝira 27, Lu-diĝira describes the beauty of his mother, comparing her to an antasura ring.

16. Fear of not having clean water to drink in the netherworld was apparently justified. For instance, UrN A 83 offers the following description:

> ú kur-ra ses-àm a kur-ra mun_4-na-àm
>
> "the food of the netherworld is bitter, the water of the netherworld is brackish."

Moreover, in the Ur tradition of GEN (UET 6/1 60, rev. 1. 10, 17), upon learning that his parents drink dirty water Gilgamesh performs funerary rites to rectify this:

> a-a-ĝu_{10} ù ama-ĝu_{10} a si-ig-ga naĝ-zé-en
>
> "Father of mine and mother of mine, drink clear water!"

SEpM 11. Letter to the Generals *(3.3.13)*

1. šagina-e-ne
2. ù-na-dug$_4$
3. šabra-ke$_4$ na-ab-bé-a
4. igi ^{íd}buranun-na
5. tum-ma-al^{ki}-šè ba-ni-ib-è
6. ù káb-ku$_5$ mah ugnim íb-ak-e
7. a-šà ĝiš-gi-du$_5$-lá-šè ba-ni-ib-è
8. a-zi-ga 1 ½ kùš im-ma-zig
9. tukum-bi ^{d}utu nu-um-ta-è
10. 7200 erín ugu-ba nu-ub-gub
11. 216,000 aša$_5$ ba-ab-tùm
12. á ma-tur nu-mu-un-da-til-en
13. a-ma-ru-kam

(2)Say to (1)the generals, (3)thus says the šabra:

(4)The surface of the Euphrates (5)has overflowed as far as Tumal (6)and the army is making a huge flood control reservoir. (7)(But) it has spread all the way to the Gišgidulla field. (8)The flood waters rose to 1 ½ cubits (0.75m). (9)If the sun does not come out, (10)not even 7200 troops will stand against it. (11)A huge amount[64] of land has already been carried away!

(12) The labor(force) is insufficient for me. I am unable to finish the task! (13)It is urgent!

Commentary

1. The form in N7, šagina-e-ne-er, is expected. I have not included the dative marker in the ecletic text, however, as it does not occur in the other six sources for this line. This is unusual as the dative is generally used in the SEpM corpus following a title or epithet (e.g. SEpM 6, 12, 16, 18).

3. On the role of the šabra in the Ur III administration see Zettler 1992, 177; Sallaberger 1999a, 194–5. It is unclear why four of seven manuscripts omit this line. šabra is a loan from Akkadian *šāpir*, so the

[64] Literally 216,000 iku = 77760 Ha, an area roughly 1/5th the size of Rhode Island.

final /k/ is unexpected. The -ke$_4$ may have become a frozen form to express only the ergative see Attinger 1993, 214 §137 r. 2. Alternatively (and despite SEpM 13:2), Attinger (personal communication) suggests reading šabra-é.

4. For igi as "surface" compare the use of Akkadian *panû* (CAD P 89f.).

6. While káb-ku$_5$ is generally understood as a reservoir used to collect and redistribute water, its precise location either directly on a main canal or off-line the canal is debated (Steinkeller 1988, 74–79; Civil 1994, 133). For the reading of NAĜ as káb see Sallaberger 1991.

7. On the identification of the Ĝišgidula field, a field located in the vicinity of Nippur, see Zettler 1992, 115f. w/n 1 and 2; Civil 1994, 184. In Ur III administrative texts it is always spelled ĝiš-gi-dul$_4$/dul$_9$-lá.

8. This line is identical to the first line of SP 15 C14.

10. The number 7200 is a common motif in Sumerian literary texts representing, "abundant" or "numerous." In reference to troops note in particular the request of Puzur-Šulgi in CKU 14 ll. 26–27.

11. The amount of flooded land, 216,000 iku, is clear hyperbole.

12. The same complaint is made in SEpM 12:11.

SEpM 12. Ur-Enlila to the ensi and saĝĝa *(B10, 3.3.4)*

1. ensi$_2$ saĝĝa-ra ù-ne-a-dug$_4$
2. ^{m}ur-^{d}en-líl-lá-ke$_4$ na-ab-bé-a
3. pa$_5$ a luh-ha a i-íb-tùm

7. ĝe$_{26}$-e pa$_5$ 1-àm za-e pa$_5$ 1-àm ensi$_2$ pa$_5$ 1-àm
8. a hé-mu-e-de$_6$ bí-in-dug$_4$ nu-mu-un-še-ge-eš
9. erin$_2$ íd-zu nu-ma pa$_5$-bi a i-íb-tùm
10. ĝe$_{26}$-e záh-bi a ma-ab-tùm
11. á ma-tur 5 ĝuruš 10 hu-mu-e-ši-in-gi$_4$-gi$_4$-ma
12. a-ma-ru-kam

(1)Say to the governor and chief temple administrator, (2)thus says Ur-Enlila:

(3)An irrigation channel, which had been cleared, was carrying water. (4)(But) Enlilaĝu and Hanzamu (5)breached it (and so) made off with (water) from it. (6)(Because of this) Lugalane said: (7)"(That) single channel is for me, (that) single channel is for you (and that) single channel is for the governor. (8)Thus water will certainly be brought to each of you." He spoke, (but) they (i.e. Enlilaĝu and Hanzamu) did not agree: (9)"Your canal has no workmen, (so) its channel carries water (unchecked)."

(10)As for me, what escapes from it carries water to me. (11)The labor (force) is insufficient for me. You should send me 5 or 10 workmen. (12)It is urgent!

Commentary

1. While there is debate as to whether this letter is addressed to one person (e.g. SEpM 14:6) or two (Civil 1994, 178f.) the plural dative case marker -ne- in X23—a text which was unavailable to Civil—proves that at least in one manuscript two separate individuals were intended.

8. X23 omits the direct object, a. The mistakes this scribe made elsewhere in the text suggest he did not understand what he was writing. The variant -me- for -mu-e- in X23 may be a phonetic writing.

9. The variant -zum na- in X23 is a result of a sandhi writing with the frequent m/n alternation. The end of the line in X23 reads pa_5 a-bi íb-tùm, "it carried the water of the channel," where pa_5 a-bi is an anticipatory genitive (for which see Zólyomi 1996: 39ff.).

10. While Civil 1994, 179 would like to see záh-bi as an adverb, its position *before* the object would be difficult to explain. Instead, I argue line 10 was structured in order to parallel, and so supplement, the second half of line 9.

11. The same complaint is made in SEpM 11:12. The Akkadian enclitic copula is best understood as an emphatic. The topos of 5 or 10 is standard in Sumerian literature to represent a small number (e.g. ELA 251: "with fewer than 5 or 10 men…"; see also CA 66, SgLeg 3N-T296 8). X23 omits the beginning of the line, á má-tur and has 5 ĝuruš saĝ-dili in place of 5 ĝuruš 10, further indication that the scribe did not understand the Sumerian.

SEpM 13. An ensi and saĝĝa to a king *(B11, 3.3.5)*

(1)The "Where-Is-It?" field (is) [...] hectares. (2)(It is) the ešgar (field) of Enlil and Ninurta. (3)From among it: 150 ha (540 iku) are (4)the sustenance fields of the men in charge of the requisitions.

(5)At its back there are 0.5 ha (2 iku) of soil (that) (6)were broken up by the hoe (and so) should be worked by the troops (but) (7)there are no plowmen to work the plot in the field. (8)(About this) *Iqbišum* and *Abiqati* (9)instituted a claim.

(10)If our king (11)consents, (12)he should send a courier. (14)He (should) give (us) an order (13)(regarding) the plowing and the boundary of the field.

Commentary

2. For the incorrect ergative marker, ke$_4$ see SEpM 11:3. While it is tempting to read saĝĝa-é, especially as the second sign differs slightly from the LÍL in l. 4 of N4 and N76. However, in light of SEpM 12:1 and 14:6 this interpretation is unlikely.

3. For a-šà da-ab-ta see PSD A/I 181 lex. 36. The Ur version replaces the Nippur field with a field called me-àm, "where is it?" expressing the scribe's unfamiliarity with the Nippur environs.

4. It is unclear whether ^{d}nin-líl should be part of the ecletic line. There does not appear to be enough space in the break at the end of the line in N78 for two divine names. It seems logical, however, for Ninlil to have been listed among the primary gods of Nippur and so I have chosen to include her here. More troublesome is why three deities, all of whom have their own Nippur temples, are lumped together. Perhaps this was a deliberate hyperbole intended to stress that the provincial authority can dispose of *any* temple land.

While éš-gàr normally designates a work assignment, here it seems to more adequately reflect one particular usage of the Akkadian *iškaru* where the term is used to qualify a field as one on which the assigned *iškaru* task was to be performed (CAD I/J 248 mng. 5).

5. For various interpretations of lú níĝ-dab$_5$-ba see Kraus 1985–6, 37f.; Sallaberger 1993, 49 n. 205; Maekawa 1995, 175f.; Widell 2005, 17 and 38f. w/n 17; al-Rawi and Verderame 2006, 75. Maekawa, for instance, proposes people who managed land for a public institution in exchange for provisions, while Sallaberger suggests those responsible for taking in charge requisitions for certain purposes such as offerings. Note especially that the title is attested in OB only in Nippur sources, although it is more wide spread in Ur III. The limited use of this term in OB may explain the Ur scribe's unfamiliarity with it. The Ur variant, lú níĝ-PAD-e-ne, seems to conflate the term lú níĝ-dab$_5$-ba with its older form lú PAD-dab$_5$-ba (Selz 1993, 152f.; FAOS 15/2 text no. 11). Alternatively, the repetition of the PAD sign in this line may have been no more than a case of dittography.

7. The names chosen here are unusual. Iqbišum is attested once in an Ur III archival source from Nippur (TMH NF 1–2, 7) and in the PN list PBS 11/1 64 no. 279. While the name Abi-qati is unattested, Civil 1994, 181 compares Ili-qati in PBS 11/1 55 no. 65.

11. The reading dúr for SU in N41 follows the suggestion of Civil 1994, 182. For dúr-bi-šè, "at the bottom, at the back," see Civil 1984, 285f. For gaba, "edge" cf. the entries listed sv. gaba a-šà PSD A/I 171.

12. Although the word dúb to express hoeing is unusual, I argue this was deliberately intended to emphasize the workers are forced to break up the earth with hoes as there were no oxen available.

13. While engar is well attested in both literary and archival sources, the other professions in this line are not. erin$_2$ tah-hu-um is otherwise unattested in Sumerian sources. tah-hu-um, a loan from Akkadian—which itself is a loan from Sumerian,—occurs elsewhere only in TH and in a half-dozen Ur III and early OB administrative sources, qualifying either ninda (bread) or siki (wool). Based on these parallels erin$_2$ here is best understood as *ṣābu*, "people, troops" and not *ṣimiltu*, "plow team."

šà-gu$_4$ is abundantly attested in Ur III archival sources and occurs in OB Nippur Lu 437 (MSL 12, 48). However, it is otherwise unattested in OB Sumerian literature.

Finally lú ĝiš apin-na, "man of the plough" is a hapax to this letter. The expected form, lú ĝiš apin-lá, is also rarely attested in OB, attested only in Nippur Lu 450 (MSL 12, 48) as APIN-lá and in GEN 265. I cannot explain the form apin-bi nu-bi in the Ur manuscript.

SEpM 14. Announcement of a Lost Seal *(B12, 5.7.a)*

1. kišib$_3$ mu-sar ur-dun dam-gàr-ra ú-gu ba-an-dé
2. inim pu-úh-ru-um-ma-ta
3. niĝir-e sila-sila-a si gù ba-ni-in-ra
4. lú na-me níĝ na-me ugu-na li-bí-in-tuku
5. ^{m}lú-^{d}suen-na šagina
6. ^{m}lugal-me-lám ensi$_2$ saĝĝa[65]
7. ^{m}zu-zu um-mi-a
8. ^{m}si-dù dub-sar
9. ^{m}ad-lul agrig
10. ^{m}ba-an-sa$_6$-ge-en gala
11. ^{m}ul-lí-a ha-za-nu-um
12. niĝir lú-ki-inim-ma

(1)The inscribed seal of Ur-dun, the merchant, was lost. (2)According to the proclamation of the assembly, (3)the herald blew the horn in all the streets. (4)He will not owe anyone anything (on account of fraudulent use of the seal).

(5)Lu-Suena, the general, (6)Lugal-melam the governor and temple administrator,[66] (7)Zuzu, the scholar, (8)Sidu, the scribe, (9)Adlul, the steward, (10)Bansagen, the lamentation performer, (11)Ullia the mayor, (12)(and) the herald are the witnesses.

Commentary

For the historical context of this text see Chapter 2.2.2.4. For discussion of the personal names see Chapter 2.4.2.

2. The *puhrum* is unattested in Ur III Gerichtsurkunden. The term first occurs with certainty in a murder trial from the reign of Ur-Ninurta of Isin (Falkenstein 1956, 32 w/n. 3). On the role of the Nippur *puhrum* see Lieberman 1992, esp. p. 134.

3. For si gù ra, "to blow the horn" see Sassmannshausen 1995, 98f.; Karahashi 2000, 111; Römer 2005, 531; Civil 2008, 102. In other literary texts, the verb is always used in the context of mobilizing an

---

[65] X15 adds: inim-inim-ne-ne ba-an<-šúm>-me-eš kišib$_3$-ba-ne-ne in-eš.
[66] X15 adds: they gave their word, they ordered their sealed tablet.

army (see also Roth 1979, 53f.). However, the verb also occurs in parallel context in the OB legal practice texts YOS 1 28 with regard to a lost seal and in FLP 1287 with regard to a decision of manumission (Roth 1979, 33).

The line also is similar to Lugalbanda I 25 and DG Seg. H 11:

niĝir(-e) kur-kur-ra si gù ba-ni-ra

"the herald made the horn resound in all the lands"

4. This expression occurs among a list of legal formulae immediately following the announcement of manumission cited above (FLP 1287 col. ii ll. 30–31: [u]gu-na [l]i-bí-in-tuku (Roth 1979, 34); note also Hh I 266–274 for which see Roth 1979, 62). This is a direction translation of the Akkadian *eli* PN *iššû*. In Sumerian the equivalent expression should be—da-tuku (Wilcke 2007, 110f.).

6. One manuscript, X15, adds an additional line here. Neither KA-KA-ne-ne ba-an-me-eš nor kišib$_3$-ba-ne-ne in-eš is attested elsewhere. The first verb however, may be a mistake for ba-an<-šúm>-me-eš,[67] although -šúm-me-eš (in place of šúm-mu-uš) is otherwise unattested. Another possibility may be to read ba-na-lá-eš as in Edubba C:16, although with a very different meaning. For the second part of the line compare the passage in the announcement of the manumission of a slave in FLP 1287 col. ii. ll. 4–6:

kišib$_3$-an-ni sag-ki-né
táb-e-dè
in-na-an-/n\e-eš

"They ordered his document (of manumission) to be (made permanent by being) fired with regard to his forehead (which is to be cleared)"[68]

This occurs also in Aa VI iv 21–23 for which see Roth 1979, 54f. The sense here is clearly that the high officials involved, the general and governor, attested to the facts of the case and had their attestation recorded on a sealed document.

---

[67] Compare FLP 1287 ll. 32–33 among a list of legal formulae:
[K]A-KA-ni
/ba\-an-šúm
"He gave to him his spoken word (= he promised him)" (Roth 1979, 34). See also CKU 23:6.

[68] Roth 1979, 33.

SEpM 15. Ilaba-tah-lugalĝa to his brothers *(B13, 3.3.6)*

1. šeš-ĝu$_{10}$-ne ù-na-dug$_4$
2. ìl-a-ba$_4$-tah-lugal-ĝá-ke$_4$ na-ab-bé-a

4. ù lugal gi-na lugal-me-er ba-an-ús
5. kaskal-kaskal-e kaskal ba-an-tah
6. ama-me èn li-bí-in-tar-re-dè-en
7. dag-gi$_4$-a-me u$_4$ na-an-šú-uš-a LUL.AŠ
8. 1 sila$_3$ mun 1 sila$_3$ gazi
9. 1 šà-ga-dù ^{túg}
10. lú-gir$_7$ hu-mu-e-gi$_4$
11. kaskal-me al-sù-ud
12. a-ma-ru-kam

(1)Say to my brothers, (2)thus says Ilaba-tah-lugalĝa:

(3)The campaign we are serving on is long. (4)And now the just king has followed our king, (5)(and so) he has extended the campaign.[69] (6)(Therefore) we cannot take care of our mother.

(7)Be sure that before the sun sets on our neighborhood, (10)you have sent a runner (with) (8)1 liter of salt, 1 liter of gazi (9)and a belt.

(11)Our campaign is long. (12)It is urgent!

Commentary

1. For the use of the singular dative infix -na- where the plural is expected see comm. SEpM 11:2.

2. The name ìl-a-ba$_4$-tah-lugal-ĝá, "Ilaba is the helper of my king," is unattested in Ur III or OB archival sources. While the DN Ilaba occurs in Sargonic period personal names, it is not common (Westenholz 1999, 78). For tah in place of á-tah see e.g. Proto-Izi I 175 (MSL 13, 23).

3. N45 makes clear that the second verb is a relative and this makes most sense if it is dependent on the first verb in the line, although the word order is admittedly unexpected.

---

[69] Literally: "added roads to the road."

4. The use of lugal gi-na as a play on the name Sargon is plausible and, together with the divine element Ilaba in the sender's name, suggests that this letter was intended to be set in the Sargonic period (e.g. Michalowski 1976, 17f.). Certainly there was a conscious play using Sargonic elements.

6. Èn tar is best understood in the sense of Akkadian *araktu parāsu*, "to take care of (person or situation)," as used primarily in OB letters.

7. LUL.AŠ is attested in OB Diri 508 (MSL 15, 48) where it is translated by the Akkadian adverb *madiš*. The reading remains uncertain. While there is an OB lexical evidence equating *mâdum* with /lu/, a reading lu_5 for LUL is unlikely if AŠ were intended to represent the terminative. Although Aa VII/4 134 (MSL 14 468) does give the value duga for LUL, it is not attested in the OB forerunner to this list, Proto Ea 578–582a (MSL 14 54f.; Steinkeller 1984, 10). The value ka_5 is, to my knowledge, only used logographically. For the pre-OB evidence see Steinkeller 1984, 13. See further e.g. Steinkeller 1984, 15 n. 21; Stol 1998, 349; Lämmerhirt 2010, 253.

Syntactically, in the admittedly few examples known to me (Nin-Turt Seg. B 5, EnkNinm 79), LUL.AŠ stands directly before the verb it modifies, whereas here it likely modifies the verb that it follows.

8. Although the precise identification of the gazi plant is not established, there is extensive literature on the subject for which see e.g. Stol 1994, 175–179; Englund 1995, 417f.; Geller 2000; Powell 2003–2005, 20; Uargyas 2001, 187–207; Pientka 2002, 515; Heeßel and al-Rawi 2003, 236; Heimpel 2009, 214; Kleinerman and Owen 2009, 57 w/n 39; Maiocchi 2009, 67.

10. lú-gir_7: *šānû*, "runner, trotter," is, to my knowledge, attested only once as a title in administrative texts (HLC 23 pl. 62 line 10; but in Sumerian literature see also SepM 16:1 and 10; NinĝNina 48, 64, 83; Lu-diĝira 6). When lú-DU occurs elsewhere in the Ur III corpus it is most likely a personal name. The lexical equation is only available in first millennium sources. However, lú-gir_7 (DU) is only a simplified version of the very common lú-$kaš_4$ (DU-š.), and this may have been what was intended.

(1–2)Speaker, speaker say to my mother, (3)thus says Monkey:

(4)(Whether) in Ur, the delightful city of Nanna, (5)(or) in Eridu, the abundant city of Enki, (6)I am (stuck) sitting behind the door of the house of the master musician. (7)(All) I am eating is (my) jealousy!

(8)May I not die of this![70] (9)As the bread is never fresh, the beer is never fresh, (10)send a runner on route for me. (11)It is urgent!

Commentary

1. The addressee of this letter—lú di lú di—has been the source of much confusion. The early translators—Falkenstein, Ali, Gordon, van Dijk, and Shaffer/Barnett—assumed this was the name of the mother, Ludiludi. While this possibility cannot be ruled out, the form would be unusual.[71] Others—Cohen, Powell—understood lú di as "passer-by" or "traveler." To my knowledge, however, the equation of di: *alāku* is attested only in Emesal, canonical Izi, and one bilingual incantation.[72]

---

[70] Alternative: "I do not want to die from this!" (Attinger 1993, 290f. §189c).

[71] In InDesc her mascara is called lú hé-em-du hé-em-du, "let a man come, let him come" (ll. 22, 110) and her pectoral is lú ĝá-nu ĝá-nu, "Come, man, come" (ll. 23, 111). The sexual connotations of the names were obviously deliberate (Sladek 1974, 81). Give the association between musicians, monkeys and sex—or, at the very least, female nudity—as seen on some OB plaques (Dunham 1985, 245f.), something similar may also have been intended here, perhaps an invented name in Emesal "lú-di-lú-di," "one who comes, one who comes," as in the Emesal translation of SP 2.35.

[72] uru$_2$-ám-i-ra-bi tablet 19 ll. 79–80. For the lexical attestations of lú di: *alāku* see Volk 1989, 128f.

Instead, lú di lú di is best understood as the substantive lú with the present participle of dug_4, di, "the one who speaks" or "speaker."[73] For the variant lú-DU, perhaps to be read as gir_7, see SEpM 15:10.

3. The manuscript tradition is divided on the species of the sender; two of six insert the Personenkeil before $^{ugu}ugu_4$-bi (N71, N74). Of the two manuscripts that are not single composition tablets—N76 and N85—only N76 preserves other attestations of personal names. In these instances, N76 consistently uses the Personenkeil. This would suggest that its absence in SEpM 16 was deliberate. As such, we are left with two sources (N74 and N85) that believed the letter was coming from a person and one source (N76) that did not. The other three manuscripts—with lack of comparative material—remain unclear. These manuscripts may simply reflect traditions in which the Personenkeil was unnecessary before a personal name.

Given that this letter ridiculed the lifestyle of street musicians, and the well-attested use of monkeys as performers, it is likely that a real monkey was intended. Regardless, the character's function is the same.

5ff. Ll. 5–7 parallel SP 3.150. While Cohen 1976, 271 suggested that the proverb was extracted from this letter, it has to have been the other way around.

7. For igi-tùm-lá, "to spy, look with envy" see most recently Alster 2005, 145 following the translation first suggested by Civil 1984, 294; Attinger 2005, 230f.; Klein and Sharlach 2007, 12; Pientka 2010, 178 w/n 36.

8. The -da- infix in this line is problematic and its interpretation is uncertain. First, the -da- could be the abilitative. This interpretation finds parallel in InDesc 43//52//60//185//199//212, nam-ba-da-an-gam-e, "don't let anyone kill her." Alternatively, -da- may be transivitising, "may it not kill me." Finally, -da- may be a phonetic or graphic variant of /ta/ for the means by which death would come.

I believe the last option is most likely. The comitative infix occurs only twice in prefix chains with forms of úš, "to die" and never with the ablative-instrumental. The first instance, CKU 14 33 is a direct

[73] Note the lú di is listed among musicians and singers in ED Lu E 96 (MSL 12, 18).

parallel to our line and so is equally ambiguous. The second instance, a proverb from Ur, may shed some light on the problem. UrProverb UET 6/2 306 2 reads: nam-me-a šaĝar ba-da-an-ug$_7$-e-še. However, the parallel proverb SP 6 142 reads: šaĝar-da ba-ug$_7$-e-dè-en-e-še. The case marker in the Nippur recension strongly suggests that the prefix in the Ur version of the proverb—and perhaps in our line as well—is indicative of the ablative-instrumental /ta/.

9. The reading gibil as opposed to pél, apud Cohen 1976, is based on context. However, a reading pél could indicate a rhetorical question, "Is the bread not spoiled? Is the beer not spoiled?" which would fit the interpretation offered here just as well. Elsewhere in Sumerian literature, however, pél is said only in the ritual sense of defiled and is never applied to food. bíl, "sour" is also possible, but is dismissed for the same reason. Although ninda gibil and kaš gibil are unattested in the Sumerian literary corpus, they are attested in Ur III administrative sources. Although the evidence from Proto Ea and Proto Aa argues strongly in favor of a reading /inda/ for ĜAR,[74] I read ninda here by convention.

The final /a/ on the verb is unexpected. While -a is a frequent orthographic variant for -àm (emphatic), we might expect at least one source to preserve the full writing. I understand the /a/ here as indicating a subordinate clause.

10. For šu taka$_4$, "to send letters, messengers or instructions" see Civil 1990, 109ff. who argues contra Powell 1978, 194 that this verb does not imply *per forma* a notion of an official or elite gift. Thus, the humor of this line does not rely on the incongruity of the sender's request for a diplomatic present of basic staples, but, instead on the very lack of such a request! Although apparently starving, the sender does not request provisions but only a return message, perhaps a further jab at the stupidity of the monkey and his musical colleagues, or, more generously, a plea for someone to come and bring him home.

[74] Proto Ea 210 (MSL 14, 40): in-da (vars. i-da-a, [in-ta]): ninda(ĜAR); Proto Aa 210:1 (MSL 14, 97) [i]n-da: ninda(GAR) = *a-ka-lu*.

(1)Say to Ilak-ni'id, (2)thus says Šamaš-ṭāb:

(3)The journey is 1 month and 15 days. You should leave at once.[75] (4–5)There is no reason you should not (be able to) report back to me[76] in Niqum by the 3rd of the month. (6)I have looked after you and arranged your way.

(7)Of the 2 donkeys, their silver: 4 skekels;
(8)Of the linen belt, it's silver: 1 shekel;
(9)The price for your boat: 1 shekel;
(10)The price for…is 1 1/3 shekel.
(11)*The water is clear.* (12)Your miscellaneous expenses will not be included among these.

---

[75] Literally: "You, yourself, should leave today" (with ud as the object of the 2nd sg. hamtu transitive verb hé-bí-DU.

[76] Literally: "bring me your news."

(13)I have calculated for you, in your presence, the value of 2 talents of dagaltum wool: (14)The merchandise is (worth)[77] 1 and 2/3 mana of silver. Bring it to me in tin! (16)Keep on the lookout for (15)the duši'a, the nirigi and the nirmušĝír stones.

(17)Your various payments—its capital—has been taken on your behalf and recorded on a tablet for you. (18)As of today report back to me.[78] (19)It is urgent!

Commentary

1. The name Ilak-nu''id, "praise your god!" is attested in Ur III administrative documents from Adab and once at Ur (Hilgert 2002, 497). The spelling of the imperative, ni-id, as preserved in all manuscripts of this letter, is otherwise unattested. There is a Mari name, Ilak-nâd (ARM 14 47:16) constructed with G-imperative of *nâdu* as opposed to the more common D-stem.[79] The imperative of *na'ādu* is *i'id*, written *i-hi-id* in OB. Perhaps the original compiler of this letter conflated the two forms, which are frequently confused (GAG 155 §107 n). Given that the form nu''id seems no longer to have been used for PNs in OB, this confusion is all the more likely.

3. The second part of l. 3, preserved in one manuscript only (N15), is problematic. Although the /a/ of ní-za would be unexpected, a translation such as "You, yourself, should go/went today," fits best within the context. Given the numerous other problems with N15 (e.g. omission of the crucial line 5, incorrect locative ending on the object in line 7, omission of the crucial object in line 14, etc.[80]), the mistaken final /a/ is perhaps not surprising.[81]

---

[77] Var. (N15): "The price is…"

[78] Literally: "bring your news here."

[79] Note also names such as DN-*na-da* for which see Stamm 1939, 202.

[80] All of which would appear to be memory errors that perhaps went uncorrected due to the scribe's incomprehension of the original the Sumerian text (cf. Delnero 2006, e.g. 157, 162ff, 1850ff).

[81] Understanding the /a/ as a locative marker it would be possible to read as "You should go/went on the day of your choosing (lit: on your own day)." Although grammatically correct (Attinger 1993, 175 §111), this use of ní-, in place of an expected šà, *libbu*, would be, to my knowledge, unparalleled. Alternatively, the locative /a/ of ní-za could be understood adverbially, indicating the manner in which the action is to be performed (Attinger 1993, 169 §105c; Delnero 2006, 245). This interpretation lends itself to a literal translation such as "You should come on your own." However, there is no obvious reason why Ilak-ni'id should be unaccompanied. Ali's suggestion

4. On the toponym Niqum, located in the middle Diyala region, see Röllig 1998–2001, 569–70. The tin and precious stones (ll. 14f.) fit with a journey eastward.

6. It is unclear here whether bar-zu (N15, N63) or bar-za (N75) is correct. The other attestations listed in PSD B 96 s.v bar A 1.5 are also ambiguous, although they seem to favor a reading with the locative, as does SEpM 6:10. While the PSD takes this passage metaphorically, "you have been checked, your ways have been corrected," in light of what follows, the passage is best taken literally indicating that Šamaš-āṭb provided both provisions and planned a route for Ilak-ni'id. For bar èn tar, "to take care of (person or situation)," see SEpM 6:10. With èn tar, the classic construction is the locative-terminative but in these texts, as in the first verbal chain appearing here, bí-in-tar, the locative and locative-terminative are not strictly distinguished (Attinger personal communication).

7. For anše-ĝiš, designating a collective of working plough donkeys, see Heimpel 1995, 87, 94. For the price of donkeys in Ur III, around four to seven shekels, see Lafont 2000, 208 w/n 7 with previous literature. The Old Babylonian prices listed in Schwenzner 1915, 111 range from five and one-half shekels for one donkey to 20 shekels. Here the *two* donkeys are only worth four shekels, which could argue for an Ur III setting, although it is questionable that the prices here are anything but random.

9. In Ur III administrative documents boat rentals are almost always contracted with barley or, occasionally, another comestible. Two exceptions, OrSp 47–49 149 and BIN 5 136, rent boats for 2 gín and 1/3 ma-na lá 1/3 gín silver. Prices for boat rentals given in Codex Hammurabi §§275ff. are considerably lower (Roth 1995, 131; Salonen 1942, 52f.). Given that the duration of this rental is perhaps intended to cover the length of Ilak-ni'id's journey (1 month and 15 days), the total cost of the boat rental may be more in line with the prices specified in Hammurabi then with the much higher wages found in the two Ur III economic sources.

(1964, 127) to read im-za and translate "You should go/went on the day of your tablet" does not fit the context.

10. This line is problematic, and the number of variants attests to the problems the Babylonian scribes had with it as well. Ali (1964, 128) did not translate the object, commenting instead that while a translation such as " 'the wage of the guide of your boat…'" is tempting, "no such meaning for masu is attested nor do the variants (á-ma-zu, á-ĝ^{iš}má-zu, á-ma-[, á-ĝ^{iš}ma-zu for mas-su) support it." Moreover, like its Sumerian equivalent, the Akkadian *massû*, "leader," is said exclusively of gods and rulers (CAD M/I 327f.). For ma as an orthographic variant of má see the references in Ali 1964, 128 n. 10.

11. Although a si.g is a common Sumerian expression for "clean water," (e.g. SEpM 10:16, 20:18) a literal interpretation does not fit the context of this passage. The sense seems to be "everything is cleared up," referring to the commodities in ll. 7–10, which were already on hand for Ilak-ni'id's journey. However, although *zakû* can have the meaning "to become free from specific claims or obligations," such as those resulting from sale, already in OB, the lexical equivalent of si.g = *zakû*, is not attested until the first millennium.

13. Previously Ali 1964, 128 n. 13 and Waetzoldt 1972, 52 n. 121 proposed that da-gal-tum-ma is a loanword from Akkadian *takiltu*, "(a precious blue-purple wool)." However, *takiltu* is unattested before MB. da-gal-tum-ma occurs three times in OB lexical lists. Twice it modifies udu, where it cannot mean purple.[82] Moreover, it does not occur among the entries for colors of sheep in Hh.[83] Instead it immediately precedes the entries for udu-bar-ĝál, "sheep with fleece," and udu-su-ga, "sheep without fleece," suggesting that da-gal-tum-ma is also a qualification relating to the fleece.

The epistemic prefix ha-, of ha-ra-da-šid, conditions the following line, in which the main purpose of the letter is stated. For the sequence dative + comitative see Attinger 1993, 232.

14. According to an Ur III Nippur protocol (BE 3, 70) that set the silver: tin ratio at 1:14.5, the value of the silver in tin is here about 24

[82] Copenhagen forerunner to Hh XIII obv col. ii 16' (MSL 8/1 92); Nippur forerunner to Hh XIII 52 (MSL 8/1 84). The term occurs by itself—and not as a modifier—in OB Nippur Lu 819 (MSL 12, 63) but, of course, no Akkadian is given. Moreover, it is difficult to glean any meaning from its position in that list as it appears after a group of similarly ambiguous terminology and is followed by vocabulary built on the word edin, "steppe."

[83] Nippur forerunner to Hh XIII 101–106 (MSL 8/1 85).

mina.[84] This is the only line in the text to use a real imperative form, in contrast to the hé- clauses used elsewhere, suggesting that l.14 is the central point of the letter and Ilak-ni'id's mission.

The number of variants found in all the manuscripts for this line indicates the problems of interpretation it caused for the Babylonian students. N15's omission of the subject, kù, further speaks to this scribe's lack of understanding of this text. The ending -àm suggests the scribe misunderstood the intended word and instead substituted the similar and (perhaps) more familiar term níĝ-sa$_{10}$-àm for níĝ-sa$_{10}$-ma. On the distinction between níĝ-sa$_{10}$-ma, "merchandise, purchasing-capital; purchases" and níĝ-sa$_{10}$(-àm), "price," see Steinkeller 1989, 161f. The variant grammatical morphemes added to ma-na, none of which conform to the phraseology expected from Ur III sale documents,[85] demonstrate once more the troubles these scribes had with standard Ur III legal terminology.

15. This exact sequence of stones is attested in *Mīs Pî Ritual* tablet 6/8 ll. 37–8 (CT 17 39 ll. 48 and 50; *ZA* 45 14:27). They are further associated in other first millennium Akkadian sources, often in conjunction with lapis and in contexts which indicate that all three were used for cylinder seals (See the references cited CAD D 201, H 227, M/II 279). However, they are not associated in any of the lexical lists or in 3rd or 2nd millennium Sumerian sources.[86]

For ^{na4}du$_8$-ši-a see most recently Schuster-Brandis 2008, 407–409. Proposals for this stone's identity include chlorite and steatite (e.g. Schuster-Brandis 2008, 407); rock crystal, agate (e.g. Archi 2003, 31f.), turquoise and topaz (e.g. de Maaijer and Jagersma 1997–1998, 280 s.v. *a-bi-za). For ^{na4}nir$_7$-igi see Veldhuis 2004, 137; Schuster-Brandis 2008, 436f. Veldhuis argues that while van Dijk's identification (1983, 120) of this stone as chalcedony is unconfirmed, a white stone does fit the context in which it is used in NaBi. The color of the ^{na4}nir$_7$-muš-ĝír stone is unclear. While the variants ^{na4}nir$_7$-muš-sù-ud in N15 and N77 are unattested, the ^{na4}nír-ud-sud is attested in the OB Nippur forerunner to Hh XVI 61a. (MSL 10, 56).

---

[84] Powell 1990, 85. This is roughly the same value that tin had in the OA merchant accounts where it was used for paying "small business expenses incurred in Anatolian trade" (Ibid.).

[85] Steinkeller 1989, 13–15.

[86] Although Cunningham (1997, 63) has identified Sumerian incantations related to the opening of the mouth ceremony in the Old Babylonian period (apud. Walker & Dick 2001, 18), parallel references to these stones do not occur.

16. For ĝeštug$_2$ ĝál see Kienast and Volk 1995, 34:16f.

17. The sequence *ha-ra-ab-*…*hu-mu-ra-ab-* occurs once more in Gudam 44.[87] The reverse hu-mu-ra-ab-…ha-ra-ab- is found in IšD B 46 and Hammurabi B 7. OBGT VI ll. 39 and 43 (MSL 4 80) understand *ha-ra-ab-* as an imperative and *hu-mu-ra-ab-* as a precative, however this distinction does not seem to hold in our passage or those parallel to it.

Instead, it is well established that the mu- prefix comes primarily with transitive, often *marû* verbs, frequently with dative referents (see Falkenstein 1949 and most recently Delnero 2010c), which suggests the translation "Your additional silver has been placed at your disposal and shall be recorded on a tablet for you." In this case, the first epistemic *ha-* clause conditions the second deonitc *ha-* clause.

One of the primary purposes of this letter may have been to practice the various uses of the *ha-* prefix, which occurs in 6 of the 12 finite forms. In each case, the verbs appear to be in the 3rd person although it occurs in contexts in which the 2nd or 1st person is expected. Such forms would perhaps be expected according to Ur III letter order conventions, were it not for the repeated use of correct 1st and 2nd person verbal infixes (dative *-ma-* and *-ra-* for instance) and suffix pronouns. Moreover, while I have chosen to translate some as *marû* and some as *hamtu*, given the context, there is nothing in the infix chains themselves to indicate which aspect was intended.

18. This line appears to be a re-statement of the message in l. 5. Of note is the contrast in the construction of the verbal forms. Line 5, na-ma-tùm, uses the dative first person infix ma-. In contrast this line, hé-em-tùm, uses the ventive /m/ as in Akkadian to express the same meaning.

[87] ama-zu anše ha-ra-ab-huĝ-e bara$_2$ al hu-mu-ra-ab-bé, "Let your mother hire a donkey for you, let her demand a sack for you" (Alster 2004).

(1)Say to Enlil-massu, the one of sweet words and good advice, mellifluous mouth of charming utterances. (3)Repeat (2)to the son who serves his god, who respects his father and mother. 7Say for a third time to (4)the alad-spirit, the protective spirit, my precious god, whose countenance and shape are pleasing, (5)epitome of the scribal art, (6)ornament of the palace, hero of the šatam officials, who reinstates commands, (7)who always pleases the heart of his king.

(8-9)Thus says Lugal-nesaĝe, the nu'eš priest of Enlil, who makes his king laugh, son of Enlil-alsag, ummia of Nippur, your father:

(10)When you abandoned me, you completely crushed me. (11)My heart sank, I lost the taste for food and drink.[88] (12)Your very being consumed

[88] Lit: "My thirst and hunger diminished."

me, your mockery overwhelmed me. (13)Your arrogance shattered me, (14)your insult finished me off. (15)Despite my attentiveness, I have been abandoned. (16)Despite my wisdom and (good) intentions, tranquility eluded (me). (17)Despite my reverence, blood and pus filled my heart. (18)Making inquiries has become too troublesome.

(19)As long as I have not gone to my (ultimate) fate, (20)may your countenance look (upon me) in accordance with Enlil's command.

Commentary

1. For inim gùn-gùn, Akkadian *kuzzubu*, see Ludwig 1990, 197 with previous literature and Peterson 2007, 600f. w/n 2329. inim gùn-gùn is entered in CAD K 617 s.v. *kuzzubu*, "to fawn, flatter (with words), to wag the tail." With inim (the reading of which is assured by the gloss -e in Samsuiluna A 32) the sense is probably closer to *kuzzubu* "luxuriant, full of charm" as in Ludwig (Attinger personal communication).

2. This line repeats the same basic sign shapes, using variations of KAL and ALAN.

6. I follow the original interpretation here (contra Jaques 2006, 20 who reads šà zalag-e-dè), as I believe this better fits the context of the line. Moreover, zalag-e is rare, one would expect instead zalag-ge.

8f. On the personal names used in this letter see Chapter 2.4.1.
On the role of the nu'eš priest, associated primarily with the Ekur in Nippur, see most recently Sallaberger and Huber Vulliet 2003–2005, 630f. For the reading bir_9 and semantic range of zú bir_9 see Jaques 2006, 70ff. and 593f. For lú zú bir_9 lugal-la, literally: "qui est le rire de son roi," see Ibid. 375 n. 803. On the title um-mi-a, used in reference to especially learned scribes see Volk 2000, 9 w/n 50, where he suggests that the title was earned after a certain age or a certain number of years in the field.

10. That $taka_4$-en-na-zu is a rare case of a finite form without a prefix chain see Attinger 1993, 194 with previous literature and Römer 2000. Although this phenomenon is more common with *marû* bases, the variant ì- in Ur8 argues in its favor.

The form hu-hu-bu-uš, in the second part of the line, is otherwise unattested (but compare ba-hu-hu-bu-dè in Charpin 1992, 13: rev. 6' and comm p. 17). For hu-hu-bu-uš AK, a loan from Akkadian *habāšum*, see PSD A/III p. 128 lex. 170 and Attinger 1995, 225. Perhaps the initial gemination was used for emphasis or intensification.

11. Translation of this line follows Woods 2008, 292 ex. 654.

12ff. Lines 12–14 and lines 15–17 form two units. Lines 12–14 are constructed of a series of clauses noun-zu íb-ROOT-en, "your X did Y to me." The Akkadian equivalents that Ur2 and UET 7 94[89] provide for these lines always gloss the noun. Lines 15–17 form a second unit marked by a series of nominal clauses ending in the ablative postposition -ta followed by a series of verbs conjugated as ba-ROOT, "in place of my X, I have become Y." The cohesiveness of this unit is illustrated by the Akkadian translations, which contra to ll.12–14, always gloss the verb.

12. UET 7 94 glosses NAM and i-si-iš as *ṣihtum*, "laughter." Although the Akkadian term has positive connotations, here the sense must be of mockery or derision. Because of this translation, Civil (2009, 67) reads bir_5 for NAM as a potential variant of zú bír, "to laugh." This, however, seems an odd choice in light of l. 8, which uses bir_9. As such, I follow the original understanding of the line.

13. UET 7 94 glosses mah with *šuqum*, "high," suggesting a translation such as "your arrogance," or perhaps even more literary, "high (status)."

14. For the gloss, *ṭuppulum*, in Ur2 and UET 7 94 used nominally compare e.g. the OB letter AbB 11 139. I cannot explain the addition of TA.LA in Ur2 or the variant bar-TE-ĝá in X22.

15. For lib bar ak see Attinger 1995, 235, and note the gloss *puqqu* in UET 7 94, even if the scribe got the Sumerian wrong, reading ní bar (Civil 2009, 67). The non-Nippur versions of this line have ki-ĝu_{10}-ta. For /ke/ as a form of the *marû* non-conjugated participle of ak see Attinger 1995, 62. For šu dag see most recently Sjöberg 1998, 355f.; Karahashi 2000, 152–54; Mittermayer 2009, 304.

16. In other words, "tranquility is far from my mind and my heart." I have chosen a more liberal translation in order to account for the parallelism in lines 15–17. This interpretation follows Attinger (personal communication). For lib ĝar see Krecher 1966, 182f. and LUr 99 in which lib ĝar is clearly something positive. It is unclear why three of the six manuscripts (N102, Ur2, X22) omit this line.

---

[89] Ch. 6.3; Civil 2009.

17. The manuscripts for this line offer a number of variants. Instead of -ta, the Ur texts add the suffix pronominal element -ne. The -ga in X22 is best understood as a miscopied -ta. Ur2 and X22 have lugud$_2$, an unusual orthographic variant. lugud occurs in three other literary texts, always preceded by úš. In all the manuscripts attested for these texts (SgLeg B 10, Inana C 45 and Ninisina A 20), as well as in the lexical entry in MSL 12 185:22, lugud is never written lugud$_2$.

The image is similar to that in SgLeg B 10 in which Ur-Zababa finds blood and pus in his urine (šà-ba úš lugud si-a-ba), an indication of his fear. The idea here seems to be the same.

18. In other words, despite his best efforts, Lugal-nesaĝe's situation has not improved. For an alternate interpretation see Woods 2008, 238 ex. 453.

19. This line contains a number of variants. The Ur manuscripts leave out the terminative postposition. Instead, Ur2 has ki nam tar-ka, "into the place of destiny" while Ur8 has only ki nam tar-ra. X22, ki nam tar-re-NE, seems to have made the verb into a conjugated participle. The variant in Ur2, nu-ub-da-ĝá, is a direct translation of the Akkadian gloss, *la aš-š*[*aʾ-ka-an*], "until I have been permanently placed." ĝá must be a phonetic variant for ĝar.

(2)Say (1)to Nintinuga, efficacious steward of the Ekur, (2)physician of the homeland; (7)Repeat to (3)the lady whose incantations cure the populace, (4)whose spell has healed the people, (5)to the compassionate lady, reviver of persons, lover of prayer; (6)to the relenting, the merciful, who hears my petitions; (8)You care for the living and the dead, (9)great healer of cripples. (10–11)Thus says Inanaka, daughter of Enlil-amah, your servant:

(12)Having taken to bed for the second time,[90] (13)I went through much woe and I do not know its course. (14)My lady, someone built a house for me, but I can only sit furtively. (15)My acquaintances and dear ones

[90] Literally: "With my being thrown to bed for the second time."

have abandoned me. (16)I have no one who inquires about me. (17)Since it is enough for me, too much for me, (18)I am truly desperate.

(19)If it is my lady's will, (20)may she cause the asag demon that is in my body to be torn out of my flesh. (21)May she stand my feet on the path of life. (22)Furthermore, as I am her servant (23)(and) the courtyard sweeper of her temple, I will serve her, (24–25)(and) as soon as I am well, I will name my lady, "healer of cripples."

Commentary

1. For Nintinuga, the manifestation of the healing goddess connected particularly with the cult of Enlil and Ninlil at Nippur see Edzard 1998–2001, 506; see also Römer 2003, 245 for further references.

6. šà gur-ru, literally "one who turns the heart," is indicative of reconciliation and relenting (Jaques 2006, 241ff., 559f.). The sequence of epithets used in this line occur in the same order in the letter of Kug-Nanna to Ninšubur Seg. A 12:

> ^{d}nin-šubur diĝir šà-lá sù šùd a-ra-zu ĝiš tuku ù-ne-dè-tah
>
> "repeat to Nin-šubur, merciful god, hearer of prayers and petitions"

10. For interpretation of the name ^{d}inana-ka see Römer 2003, 246. On the historical Inanaka, daughter of Enlil-amah, attested in the Ur III Nippur Inana temple archives see Hallo 1972, 92; Zettler 1984, 6; 1992, 203.

12. The meaning of this line is suggested by Lugale 584. Embedded within a recounting of the horrible destiny that awaits the ^{na4}ša-ga-ra stone, is the following:

> ki-nú-za hé-bí-šub-bé
>
> "You will be thrown onto your bed!"

Lines 585ff. continue that no one will tell the stone to "get up," no one will miss it, and no one will complain about its loss. As such, the šagara stone's destiny is similar to the complaints Inanaka makes in ll. 14–16. It is tempting to speculate that ki-nú šub was a euphemism for a particular ailment, perhaps loneliness or isolation, resulting in the consequences described in Lugale 585ff. and in this letter.

This interpretation is very different from previous editors, yet adheres more closely to the literal Sumerian. Römer 2003, 247 follows

Ali in understanding šub as *ezēbu*, "to leave." However, evidence for this reading comes only from a first millennium commentary.[91] For the comitative postposition -da denoting simultaneous action, "while," see the references given by Romer 2003, 247.

17. Römer 2003, 244 assumes an underlying subject šà and translates "da (mein Herz) voll ist, weil es übervoll ist." Similar sentiment is expressed in NMŠ 138 and Edubba B 64f.

21. For ki-in-DU see Volk 1995, 162f.; Attinger and Krebernik 2005, 67.[92] The variant in Ur10, ki nam-DU, "the place of standing," gives further indication of the meaning intended. Böck and Römer read ki-in-gub. The reading gub, however, is not certain; udug-hul forerunner l. 247 reads ki-in-du while the parallel l. 367 reads ki-in-da, and see also Veldhuis 2008, 43 D iv 11–15 and comm. p. 49.

[91] CAD E, 416: ŠUB // *na-du-u* // ŠUB // *e-ze-bi* (CT 41 44:14 = Theodicy commentary). Moreover, Römer 2003, 247 cites a number of passages in which he believes šub has this meaning. However, in these cases, the translation "to fall" fits the context as well. See for instance LN 99: uru_2-bi uru_2 šub-ba im-ma-ni-in-ku_4-ra-àm, in which a translation "He turned that city into a fallen city" expresses the same sentiment as Tinney's "That city he turned into a city neglected."

[92] For a different interpretation see Ludwig 1990, 201 n. 477 where she understands ki-in-gub as a variant for ki-gub/ki-lugal-gub, a physical location as in IšD A 81, ŠA 56.

(1)Lugal-nesaĝe, son of Zuzu, ummia of Nippur, (2)fashioned Tuni-lusag, his canine emissary, for Nintinuga. (3)To this end, the dog wags its tail at its mistress and barks at her:

(4)"Mistress, who provided sustenance in heaven and earth, steward of Enlil, (5)sweet breast, satisfying all the lands, bringing abundance, (6)scrutinizing the intentions of the wounding asag-demon, the one who examines the bones, (7)sorting the sinews of life (and) the sinews of death, the one who makes bandages beautiful, (8)who knows those diseases exacerbated by wounds and deep afflictions, (9)the healing physician, šimmu priest to the sick, observing the entrails of mankind,

(10)My mistress, who fashioned me, (11)my name is Tuni-lusag. (12)After it (= the disease) had healed, I was so named.

---

[93] X11 adds: ma-an-sa$_6$-ga mu-šè mu-sa$_4$-a-me-en.

(13)(But) when…the throat, the asag-demon…(my) life. (14)My name is invoked alongside your name! (15)I seek your strength! (16)I am called Tuni-lusag!"[94]

(17)As long as I live may I be regarded (with benevolence). (18)When I die, may I drink clear water in the netherworld.

Commentary

2. The name tu_6-ni-lú-sag_9, "her spell heals a person," is fitting for a dog meant to intercede before a healing goddess on his master's behalf (compare Ninisina A 37; Cavigneaux and Krebernik 1998–2001b). The association between the healing goddess and the dog is well attested.[95] Bronze and clay figurines of dogs are especially common in first millennium contexts, most notably in the Gula temple in Isin,[96] where they served as ex-votive offerings.[97] Although many are not inscribed, a small handful of dedicatory inscriptions are attested on such figurines.[98] For animal figurines named in their inscriptions see, e.g., Braun-Holzinger 1991, 327 (T14) and 328 (T18).

3. The expression kun gùn is attested elsewhere only in the late lexical list Antagal III 267 (MSL 17, 160) and in a bilingual proverb collection from the Assurbanipal libraries (BWL 229:30). In both instances kun gùn is equated with Akkadian *kuzzubu*, "to fawn, to flatter (with words), to wag the tail." Although these attestations are first millennium, this seems to be the meaning intended here.[99] The variant in

---

[94] X11 adds: After she healed me (lit: after having been good to me), it is I who was named thus!

[95] See Heimpel 1972–1975, 496f.; Herles 2006, 208f.; Attinger 2008, 60.

[96] Braun-Holzinger 1984, 90f. In particular, Nos. 298–300.03 and 312, are dog figurines found at Isin and Nippur that can be dated to the OB and Kassite periods.

[97] Braun-Holzinger 1991, 322. See for instance the terracotta dog from from Kassite period Isin with an inscription to Gula specifying the reason for the dedication: *ik-ri-bi-i-šu iš-m*[*e*], "she heard his prayer." (Wilcke 1977, 90 E 8 (IB 18); Braun-Holzinger 1991, 2 n. 13). Although such figurines do not become common until Kassite period Isin, clear references that consecration gifts were made out of thanks for a prayer granted are attested already in the early second millennium (Ibid., 2).

[98] Braun-Holzinger 1991, 7. For inscribed dog figurines dating to the OB period see Braun-Holzinger 1991, 328 T17, T18, T19. T17 is a dog dedicated to Ninisina by one Enlil-ennam on behalf of Bur-Suen, king of Isin. T18 (= RIME 4.2.7.2001), found at Tello, is similarly dedicated to Ninisina, here by Abba-duga, the Lumah priest, on behalf of Sumuel, king of Ur. T19 is unpublished. For other periods see the references listed in Braun-Holzinger 1984, 90ff. and Edzard 1998–2001, 506.

[99] For kun gùn see now Peterson 2007, 592 and 599ff. Compare the expression kas_4 gùn in Shulgi A 73, which expresses the action of running. Cooper (personal com-

X11, mu-un-na-ab-sì-ge, "he fashions it for her," repeats the sentiment of line 2.

4. Elsewhere the epithet nin agrig ^{d}en-líl-lá is always modified by zid, as in SEpM 17:1: ^{d}nin-tin-ug$_5$-ga agrig zid é-kur-ra. For the epithet šukur$_2$ sum see IšD B 14 and Ninisina E 18, 26.

5. The reading of the sign DAG.KISIM$_5$*GA is provided by the gloss a-ka-an in N5. Because of the lack of glosses or Akkadian translations in most Sumerian texts, it is unclear whether the choice of akan in our text should be unexpected.[100] The preference for the reading ubur (Akk: *tulû*) in many modern editions of Sumerian literary texts seems to be based only on the more frequent attestation of the Akkadian *tulû* than *sirtu*, the translation given for the reading akan (Ea IV 60, Aa VIII/4:181–182).[101] However, the use of the gloss here may in fact support the rarity of this word.

6. The á-sàg demon is more commonly characterized as gig-ga, "virulent," cf. Geller UHF 799; Sin-iddinam to Utu 28. In several texts, however, he is described as being capable of inflicting wounds, e.g. Lugale 177:

> ki-a su bí-íb-dar sim$_x$-ma bí-íb-ĝar
>
> (the asag demon) tore the flesh of the Earth and covered her with painful wounds

---

munication) suggests that in such instances gùn refers to quick repetitive movements, in our example of the tail moving rapidly through the air causing sparks of color. This is similar to the action behind the verb kun sud, in which sud also seems to describe rapid, repetitive motion (Peterson 2004; 2007, 592, 597–600).

Peterson argued that kun sud, the well attested verb for "to wag the tail" is used primarily to represent a state of arousal, characterizing an animal's aggressive physical behavior, as in anticipation of a fight. It is also attested expressing the poplar opposite of this state—an animal in a state of relaxation. kun gùn may have been used in place of kun sud to represent a third state in which a dog would wag his tail not included in the semantic range of kun sud; namely that of a dog's happiness at seeing his master.

[100] PSD A/III 132 sv. akan lists several passages whose text editors prefer the reading ubur (e.g. Lipit-Ištar D 6, SP 2.59, for which there are no variants or glosses in any manuscript of either text to support one reading over the other).

[101] Moreover, the semantic range of *tulû*, "breast," is much wider. While *sirtu* refers specifically to the nipple and occurs only in the contexts of suckling, *tulû* has this meaning as well. That ubur can be used for suckling is made explicit by SEpM 7:18 where N68 resumes the /r/ auslaut in the form ubur-ra-gin$_7$. Moreover EnlSud l. 5, in a passage referring to suckling, has DAG.KISIM$_5$*GA translated in the bilingual version as [*t*]*u-le-e*.

Thus, the appearance of an á-sàg sim_x-ma, "wounding asag" in this text is consistent with at least some aspects of this demon. Other examples include the Letter Nanna-mansum to Ninisina 6–7 and Ninisina A 21. The demon's ability to wound, coupled with the reference to ĝiri_3-pa_x-rá igi bar-re, "examining the bones," emphasizes that Nintinuga can heal both external and internal ailments.

7. The oblique marker on the logical direct object, -a or -e, renders the translation ambiguous. To select one thing from another, we would expect -ta as in ŠV 16: ùĝ-ta igi saĝ$_5$-ĝá, "selected from among the people." As such the notion of sorting between the two seems to have intended. Alternatively, igi saĝ$_5$ can be "to inspect, verify" for which see Schramkamp 2008, 680. In general, see most recently Waetzoldt 2010. níĝ-kéš, "bandage," was discussed already by Sjöberg 1991, 221 l. 15' (comm. p. 223). The idea here is "the one who knows how to properly dress a wound."

8. For níĝ-ra-ah, translated by *simmī*, "my wound," see Civil 2010, 158, 12: 24f.

níĝ dug_4-ga is translated by *dâku* in the SB list of diseases l. 125 (MSL 9 94) and further references provided by Attinger 1993, 627 §680, written both with and without níĝ. For ki-gig "disease" see Cavigneaux and al-Rawi 1995, 35. This is to be distinguished from ki gig-ga, "location of a disease" for which see Schwemer 2009, 50 l. 9 and comm. p. 55.

9. On the role of the šim-mú priest, especially as the purification and incantation priest of Ninisina and Nintinugga, see Geller 1985, 92f.; Sallaberger and Huber Vulliet 2003–2005, 619; Ceccarelli 2009, 36f. I cannot explain the -ta in dú-ra-ta.

13. Civil 1969, 180 suggests either zi ba-an-/da\-[gi_4] "et l'asakku s'apaisera" or zi ba-an-/da\-[ir] "et l'asakku sera plein de peur." However, Karahashi 2000 176ff. demonstrates that zi ir and zi gi_4 describe emotional states. Something more forceful better fits the context.

15. For the semantic range of ki kíĝ see Veldhuis 2004, 139 and the references collected by Michalowski 1989, 71f. This seems to be the only attestation in which the semantic object is metaphorical. The idea is that Lugal-nesaĝe seeks Nintinuga's power to heal.

SEpM 21. Inim-Inana to Enlil-massu *(B19, 3.3.11)*

1. ^{md}en-líl-mas-su ù-na-dug$_4$
2. ^{m}inim-^{d}inana-ke$_4$ na-ab-bé-a
3. inim na-me ma-an-ne-eš-ma LUL.AŠ ba-húl-en
4. ^{d}lamma ud-ti-la a-kal-la lugal-šú
5. na<-bi>-^{d}en-líl ù ^{d}en-líl-al-sag$_9$
6. um-mi-a ŠU.IGI.DU-zu-ne
7. ^{d}nin-imma$_3$ diĝir-zu
8. ù ^{d}nidaba nin ĝeštug$_2$ daĝal-la-ke$_4$
9. geštug$_2$ ha-ra-ab-šúm-mu-ne
10. níĝ im-ma im-sar-re-a
11. iri šu-bi nu-gi$_4$ al-me-a nu-e-zu-ù
12. 2 gín kug-babbar 1 túg 2 ^{túg}bar-sig$_9$
13. lú-gi-na šu mu-ra-tak$_4$-tak$_4$ šu ti-ba-ab
14. ha-la da$_{13}$-da$_{13}$ ama-zu šu nam-bí-te-en-tèĝ
15. a-ma-ru-kam

(1)Say to Enlil-massu, (2)thus says Inim-Inana:

(3)Everything they told me made me very happy.[102]

(9)May (4)Lamma, Ud-tila, Akala, Lugal-šu, (5)Na<bi>-Enlil and Enlil-alsag, (6)scholars who preceded you, (7)Nin-imma, your goddess and (8)Nidaba, lady of broad wisdom, (9)give you wisdom.

(10)Regarding what was written on the tablet, (11)did you not know it's the case that the city does not settle accounts?

(12–13)Lu-gina is sending you 2 shekels of silver, 1 garment and 2 shawls. Take them! (14)(But) your mother should not take the remainder of the inheritance. (15)It is urgent!

Commentary

3. The indefinite pronoun na-me does not occur elsewhere modifying inim. However, see for instance ARM 3 18:5 *awatam mimma lemuttam ešme*, "I heard something bad" (CAD M/II 78). Whether inim na-me here refers to something in particular that Inim-Inana was told, or

[102] Literally: They spoke every word to me and I have become very happy.

anything that Inim-Inana heard, is unclear. Elsewhere, when na—me modifies níĝ (the closest parallel to inim), translation of "everything" as opposed to "anything" or "something" seems to be based only on editorial predilection.

For the problem of the reading and meaning of LUL, "much," see SEpM 15:7. Jaques 2006, 449 n. 976 interprets LUL as *sarru* + a + eš(e) (= adverb of manner) and translates "Ils m'ont dit chaque parole et (je me suis mensongèrement réjoui =) j'ai fait semblant de me réjouir." While this might fit the context in this laconic missive, it does not fit the use of LUL.AŠ in SEpM 15:7.

Woods (2008, 295) cites this line and a parallel expression in an OAkk letter, *áš-má-ma ah-tá-dú*, in order to demonstrate an inherent perfect nuance to actions constructed with the prefix ba-. As such, the verbal suffix -en in N55 must be correct, representing the first person subject of the intransitive *hamtu* verb. Although the variant -e for -en is uncommon writings such bí-in-túm-mu for bí-in-túm-me-en do occur (EJN 25; see also Attinger 1993, 222 n. 513; Delnero 2006, 576).

4f. I follow Ali in assuming that Lamma, Ud-tila, and Akala were three separate persons. ETCSL reads Lamma as the personal good-luck genie of that name and u_4 til-la-a kal-le as her epithet. Given that this epithet is otherwise unattested in Sumerian literature and that the other names in lines 4 and 5 are clearly those of persons—in contrast to the gods named in lines 7 and 8—I interpret Lamma as an element of a personal name.

Ali was troubled by the lack of a *Personenkeil* before Lamma. This is perhaps not surprising given that the manuscripts are not consistent on the use of the *Personenkeil* in the following line, although we might have expected N56 to use the *Personenkeil* consistently throughout his text. For Lugal-šú see Ch. 2.4.1. For Na<bi>-Enlil see Chapter 2.4.3.

6. For the rare use ŠU.IGI.DU in Sumerian literary texts see the discussion in Ludwig 1990, 51 n. 124 but note its more frequent use in Ur III accounts. Although the lexical equivalent, *mahra*, is attested only in the first millennium, a translation "before, earlier," best fits the context for all occurrences of this term.

10. For im = *ṭuppu* "tablet" as opposed to the more common dub see SEpM 17:17.

11. For al-me-a compare ANL 9:15, Dialogue 2:55, Dialogue 3:175.

12f. That N55 omits ll. 12–13 suggests the scribe did not understand their relevance to the overall message. While it is also possible that the omission was simply a mechanical error, the number of other mistakes in N55 (especially the omission of the verbal root in the first finite verb of line 11!) indicates that the variants within this manuscript resulted from incorrect or alternate interpretation of the text (Delnero 2006, 1851).

13. For Lu-gina see Ch. 2.4.2. s.v. Lu-Suena.

SEpM 22. Inim-Inana to Lugal-ibila *(B20, 3.3.12)*

1. ^{m}lugal-ibila ù-na-dug$_4$
2. ^{m}inim-^{d}inana-ke$_4$ na-ab-bé-a
3. eme-gir$_{15}$-šè gú-zu na-ab-šub-bé-en
4. 2-kam-ma-šè eme si sá-bi-šè lú mu-e-ši-in-gi$_4$-gi$_4$
5. lú-tur igi-zu-šè al-durun-ù-na
6. é-dub-ba-a-ta na-ab-ta-è-en
7. na-an-ga-ma lú na-me lul i-ri-ib-sì-ke
8. ugu ad-da-na-šè ga-àm-ĝen a-ra-ab-bé
9. en-na ĝiškim ĝe$_{26}$-e ù za-e KA ì-bal-en-da-na
10. lú mu-e-ši-in-gi$_4$-gi$_4$
11. lú-tur šu nam-bí-bar-re-en
12. [x x (x)][103]-ma bí-tuku a-ma-ru-kam[104]

(1)Say to Lugal-ibila, (2)thus says Inim-Inana:

(3)Do not neglect Sumerian! (4)For the second time, I am sending you a message in the proper language.

(5–6)Do not let the children seated before you leave school. (7)Moreover, should someone try to deceive you (8)saying to you "I want to go" on the authority of his father, (9)until you and I have discussed the proper time (10)(and/or) I send someone to you (with the OK), (11)do not let any of the kids go! (12)You are responsible for…[105] It is urgent!

Commentary

3. This exhortation is attested elsewhere in the scribal literature, for which see the references collected in Sjöberg 1972, 128. Here it is somewhat ironic, turned on the teacher and not the student.

7. For lul sì see Civil 2000a, 109; Gadotti 2005, 533; Lämmerhirt 2010, 288. The variant sa$_6$-ge in N24 suggests a misunderstanding on

[103] Although Civil 2000a, 108 restores [silim], N79, at least, has room in the break for at least two signs.

[104] Variant (X4): [l]ú-tur silim-ma-ni ad-da-[a?-ni?] KA-za in-tuku.

[105] Variant (X4): "his father has entrusted the welfare of the child to you (lit: in your mouth)." I have restored this line following that preserved in the late period redaction of this letter, the letter of Lugal-ibila to Lugal-nesage line 21, for which see Civil 2000a, 109ff.

the part of this scribe, but without the first part of the line it is impossible to know what he intended.

8. For the neologism ugu…(-ak)-šè/a see most recently Huber 2001, 171–175.

9. While Civil 2000a, 109 reads ka bal here, the variant KA-ma in N81 argues in favor of inim bal. OB lexical text YBC 9869 iii 27, however, contains the entry for KA bal in the section of compounds formed with the KA sign read /ka/ (Michalowski 1978, 117). To reflect the likelihood of different readings in different schools or regions, I read KA here.

ANL Introductory Remarks

Published here are the nine (of twelve) ANL letters to which I had access. I was not able to look at the one unpublished manuscript of ANL 5, and so I have not included this letter. In addition, identification of X25 (MS 2287) came to my attention too late for inclusion. ANL 7 will thus be published later, in a forthcoming collection of Sumerian literary tablets in the Schøyen Collection. Finally, ANL 2 also will appear separately.

Several other tablets came to my attention as possible Nippur letters, CBS 12651, Ni 2331 (SLTN 139), as well as two compositions found on the large compilation tablet N70 (Ni 3023+) and one on X18 (VAT 9157) with partial duplicate UM 29-16-10. However, study of these fragments does not give any certain indication that they are letters.[106] For that reason, they are not published in this collection.

ANL 1. Gudea to His God (3.3.20)

1. diĝir-ĝá ù-na-dug$_4$
2. ^{m}gù-dé-a arad-zu na-ab-bé-a
3. udu-gin$_7$ sipad gi-na nu-tuku
4. na-gada gi-na nu-mu-un-túm-túm-mu
5. dam-gàr saĝ dù-dù nu-zu bal-šè mu-e-ni-ak
6. anše-gin$_7$ ^{kuš}usan$_3$ hul-ĝál-la hul-ĝál-la bí-in-[x]
7. saĝ ì-tuku inim nu-um-me igi tuku igi mu-[u]n-íl
8. níĝ ak-a-ĝu$_{10}$ a-rá 7-e nu-un-DU x x
9. zag-ba a-rá 7-e nu-mu-un-da-pàd
10. diĝir-ĝu$_{10}$ lú kúr di nu-me-en šà-zu ki-bi ha-ma-ab-gi$_4$-gi$_4$[107]

(1)Say to my god, (2)thus says Gudea, your servant:

(3)Like a sheep, who has no reliable shepherd, (4)I have no reliable herdsman to guide me. (5)(Instead) I have been forced to accompany

[106] Such as ù-na-dug$_4$, na-ab-bé-a, or ù-na-dè-tah or standard closing exhortations. In addition to the tablets listed above, there are fragmentary lines associated with Ni 4164 (ISET 2 117), that may be part of a letter. However, as the main composition preserved on this compilation tablet is CKU 20, it is more likely that this unidentified letter is a fragment of a CKU letter and not a SEpM or ANL composition.

[107] Var (Su2): diĝir-ĝu$_{10}$ lú kúr-zu nu-me-en ba-ar-mé en-tar-re.

an imprudent merchant. (6)Like a donkey he [strikes? me] (with) a brutal whip.

(7)I am important, but I must say nothing; has he seen that I am vigilant? (8)Seven times my doing this has not… (9)At it's side, seven times, I have not found/recognized him. (10)My god, I am not one who speaks angrily! May your heart revert to its previous sentiment for me![108]

Commentary

4. On the role of the na-gada as a high-ranking bureaucrat see Garfinkle 2000, 45f.; Lang 2006.

5. For saĝ-dù-dù see Sjöberg 1973a, 128f.

6. Although the verb is broken, the sense is that the petitioner is treated like a beast of burden. In IšD I A 35 a whip ($usan_3$) is said to rile up (zig) a donkey.

7. saĝ tuku is well attested, but not normally as a verb (see e.g. Römer 1965, 160; Sjöberg 1966; Cohen 1981, 170; Selz 1995, 24 w/n 59; Behrens 1998, 109).

9. The interpretation of this line is entirely unclear.

10. Although it is not entirely certain that Su2 is ANL1 and not a similar plea, the parallel is close enough to merit inclusion here.

[108] Var (Su2): My god, I am not your enemy. Inquire about me!

ANL 3. Iddatum to Sumutara *(3.3.15)*

Source

N117 = UM 29-16-41 (Michalowski 1978, 120) = 1–7

[109] Compare to form in IdD A 224 C (Mittermayer 2006, no. 264).

[110] Collated, order of ll. 9 and 10 in Civil 2000a is incorrect.

[111] Collated, line left out of copy in PBS 12.

[112] While there are large gaps after ll. 12, 13, and 14, the lines above (e.g. ll. 7, 9) also have large spaces between the last sign on the line and the sign immediately preceding it. As such these three lines may be essentially complete as stands.

[113] Civil 2000a, 105 suggests a gap of circa 10 lines.

(1)Say to Nudimmudsiga, (2)thus says Igmil-Sin, your father:

(3–4)When I arrived as governor (3)to Dunnum, on the bank of the Amar-Suen canal, (5)(all) the students, from the youngest to the eldest, (6)from the ones doing the series meme, to the ones doing an array of (compositions on) tablets, (7)from the ones doing multiplication tablets to the ones doing their business accounts,[114] (8)the ones doing incantations, the ones who interpret songs, (10)during the day and *into the night* I had them write (9)their multi-column tablets, their single-column tablets (or) their lenticular tablets. (11)I had them deposited in my "hand" basket(s).

(12)For your part, you transferred the (texts of the balaĝ) uru am-ma-ir-ra-bi. (13)The ones (who write) their single-column tablets… (14)the ones (who write) accounts…
(ca. 10 lines missing)
2 lines unclear
(17)Your gift […]. (18)My well-being, [your] well-being, (19)and the well being of the students […]. (20)Liburam […]. (21)Like my changed city, my heart will […].

Commentary

1. The name Nudimmudsiga is unattested in the Ur III administrative and OB Nippur corpora, although the Akkadian version of the name, Ea-bani, occurs in both (Stone 1987, 237; TMH NF 1–2, 351, 351b). The form Ibni-Ea also occurs in OB and Ur III Nippur, e.g. Stone 1987, 245; NRVN 1, 224.

2. For Igmil-Sin see Ch.2.4.3.

3. On the location of Dunnum and the Amar-Suena canal see SEpM 4:9f.

4. For du-a-[ĝu$_{10}$]-ne, a (possible) neologism of du-ĝu$_{10}$-ne (Balke 2006, 69f. w/n 309–311) compare ŠB 121 (5 manuscripts with du-ĝu$_{10}$-ne versus two with du-a-ĝu$_{10}$-ne); ELA 631; CKU 1:9.

6. me-me is the first entry of the elementary lexical list Silbenalphabet A, the non-Nippur recension of Silbenalphabet B (Civil 1985 73f.;

[114] Perhaps "model contracts"?

Civil 2000a 106 n. 5). This text is referred to elsewhere in the scribal literature, eg. Edubba D 11–14:

11. [dub] /ki-en-gi ki\-uri-ke$_4$ a-a me-me-ta
12. [x x x]-šè ì-šid ù ì-sar
13. /mu\ dil-dil ^{d}inana-téš-ta
14. edin-a níĝ zi-ĝál-edin-a zag lú-šu-ka-šè ì-sar

"I have (already) recited and written the Sumerian and Akkadian [tablets] from (the syllabery) a-a me-me up to.... I have written all the lines from (the list of personal names) Inana-teš up to (the series) lú = *šū*, even the old fashioned forms."[115]

7. Elsewhere, scribes extol their competence in multiplication and accounting, see e.g. Exam Text A 27 (Sjöberg 1976, 167) and Edubba D 28 (Civil 1985).

8. Despite the absence of incantations at Nippur, ka-inim-ma must be an incantation and not a word list, which likely would have been cited by name as in l. 6. The juxtaposition of this term with èn-du is further evidence in favor of this interpretation. This is especially the case in ANL 8:12 where ka-inim-ma 20-àm 30-àm is parallel to èn-du 10-àm 20-àm. This cannot mean 20 or 30 words, which would be far too few, but also not 20 or 30 lexical texts, far too many.

9. See George 1993, 70f. for the identification of im-šu as a lentil in OB. Essentially these tablets were homework, assigned—at least in the Edubba texts—to the students to work on in the evenings (Civil 1985, 75f.). The suggestion that im-dub-ba is a multi-column tablet is based on context.

10. u$_4$-da zal-la-bi, literally "during the day and after it passes," is otherwise unattested.

11. ^{gi}bisaĝ-šu is attested in Hh VIII-IX OB forerunner 45 (MSL 7, 185; and see Foster 1982b, 16f; Limet 1986, 276; Civil 2008, 135). Note also the entry in Hh VIII Emar 117: ^{gi}bisaĝ-šu-kam-ma = *ša me-ri-il-ti*, "reed basket for supplies."

---

[115] Translation and interpretation of l. 14 follows Civil 1985, 74. For an alternative version see Sjöberg 1976, 162ff. SP 2.48 contains a similar reference:

lú a-a nu-mu-un-da-ak-da-àm eme kaš$_4$-kaš$_4$ me-da hé-en-tùm

"One who cannot produce (the series) a-a, how will he achieve fluid speech?"

12. For this well attested balaĝ composition see Cohen 1988, 536ff.; Volk 1989.

20. The name li-bur-ra-am is unattested in the Ur III administrative corpus but does occur in OB Nippur (Stone 1987, 258).

[116] Restorations based on Version B.

Commentary

2. While Cohen (1977, 10f.) attempted to identify Lu-Ninurta with a historical official at the Ninurta temple in Nippur, he is more likely an invented character with a name chosen to reflect his profession.
On the function of the ugula é, the top official in a temple household, see Zettler 1992, 177; Sallaberger and Huber-Vulliet 2003–2005, 628f. The title ugula é-^{d}nin-urta is unattested in the Ur III administrative corpus, although it does occur in one text from Sargonic period Nippur (OSP 2, 134).

5. The name must be a-a-^{d}nin-urta, "the father is Ninurta." The writing a-an-^{d}nin-urta in Version B is certainly an error under the influence of a-a-an- from the line above.

9. Although Cohen 1977 suggested the restoration [á?-šè? zé?-z]u at the beginning of the line, there seems to be room for only one sign.

Version B

1. ^{d}inana-an-dùl–du$_{10}$-ga-ra ù-na-a-dug$_4$
2. ^{m}lú-^{d}nin–urta saĝĝa? x é-^{d}nin-urta

10. a-na x /ki\-bi-/šè\ ba-an-díb
11. /x\ ma /x um?/zé?\ ù?-me?-dím?
12. [a-ma-ru]-kam

[1]Say to Inana-andul-duga, [3]thus says [2]Lu-Ninurta, administrator of the Ninurta temple:

[4]May you continually serve in the Ešumeša, the temple of Ninurta.

[5]Concerning your "trimmings" that have been checked, [6]your messengers have taken them to Nippur. [7]In the meantime, I will make sure you receive…

[8]Aa-andul, the servant of the en-priest of Ninurta [9](and) Ninurta received it. [10]What…did he transfer to its place? [11]….[12]It is urgent!

Commentary

4. See CAD A/I 309 for *alāku* in the sense of "to serve, to do service," and in particular the nuance of "to go, walk about, to live, act, to be in motion" when used in the N-stem (p. 324). For conventional greetings in Akkadian daily-life letters see Sallaberger 1999b, 74ff., esp. pp. 78–84. This particular formula seems to be paralleled only in an Assurbanipal inscription: DU.DU-*ku Emašmaš lulabbira šēpā'a*, "may my feet reach old age going to and from in (your temple) Emašmaš" (Streck Asb 276:18).

5. gur_5-ru(-uš)/$guru_5$, "to grind, cut, trim," is attested frequently with plants (e.g. Gudea Cyl. A 22.2; LSUr 87, GEN 204). It is also used in the general sense of destruction (e.g. LUnug 67) and is the verb used for a snake when it spits venom ($uš_7$) or bile (zé) (e.g. Gudea Cyl. A 10.23; IšE B Seg. B 4). For the distinction between /guruš/, a noun denoting originally a hairstyle, and /guru/ a verb with the basic meaning "to cut," see Attinger 1993, 521ff. The sense of the term in this line should indicate a portion that has been set aside, perhaps a portion of some agricultural item which has in fact been $guru_5$'ed.

10. Although Cohen 1977 reads zé, "cuttings," we would expect zé-a (here and in line 7). The sense of ki-bi-šè díb is unclear, but compare Lugale 47.

11. ù-me-dím needs collation as a verbal form beginning with ù- should not end a clause, see Civil 2000b, 39.

(1)Say to my colleagues, (2) thus says Nabi-Enlil, the scribe…their brother…

(3) From youth we learned…(4)You raised me like your child. (5)Like righteous men, we did not frown like one who had…(6)For me you had (re)turned…

(rest fragmentary)

Discussion

Although much is preserved in several lines of the reverse, I have chosen to leave it untranslated. Given that key words are missing at both the end and middle of the lines, the sense is almost impossible to render.

(1)Say to Diĝir-inim-siga (3)thus says (2)Nabi-Enlil, the scribe, the son of Saĝ-Enlila:

(4)This is what I have done (so that) (5)the youngsters would get a whiff of Nippur!

(6)For three years I have been replaced with someone. (8)I told KA-Ninurta (7)that the place they (the youngsters) were staying was in the

[117] Restorations following van Dijk, 1989 unless otherwise specified.

teacher's house, but not only did it not seem good (enough) to me, (8)the person (instructing them) was incompetent as well. (9)Out of regard for my teacher's house, I have not opened my mouth (publicly). (10)Now then, the place where they are staying is just not a proper school! (11)No one can get an education (there)! (12)No one could recite (even) 20 or 30 incantations, (13)nor perform 10 or 20 songs. (14)(But) from the start I did not want to open my mouth about the house of my teacher.

(15)Didn't you know it's the case that the school in Nippur is unique? (16)He (KA-Ninurta?) told you that…is incompetent, but you do not appreciate the importance of his words.[118] (17)So that, to my credit, they will be able to get a good education, (18)get informed of everything that is tested everywhere in Nippur as well as Isin! (20)I will have them learn: (19)incantations, songs, royal inscriptions, Sumerian, panegyric, (20)…up to and including the lamentation corpus! (21)I will establish it for them in a great place, just like Nippur is! (22)I will deposit [n (units)] of gold (and) 1 talent of silver to their credit.

(23)Do not neglect…! (24)Do not keep the kids from…speech! (25)Do not let them bypass (any aspect of) the curriculum! (26)They should learn…, the alala songs, (as well as) the series izi and lú-*ša*. (27)(If so, then) in the future, I shall never complain again![119]

Commentary

Although the language and grammar of this letter are relatively straight forward, interpretation is surprisingly difficult. Presumably Nabi-Enlil has traveled to Nippur and is writing back (home), regarding schooling in his hometown. Line 4 seems to set the stage for the rest of the letter clarifying from the outset that Nabi-Enlil has made arrangements for the students at home to receive an education comparable to that which they would get in Nippur.

Lines 6–14 give the back-story. Nabi-Enlil was replaced by another teacher, who proved to be unsatisfactory (ll. 6–8). Out of respect for his own teacher, Nabi-Enlil could not complain publicly but instead registered a complaint with one KA-Ninurta (l. 9), whose identity is unclear. Now Nabi-Enlil is providing instructions as to what makes

[118] Literally: "you leave out the importance of his mouth." (Translation following Attinger, personal communication).

[119] Alternative: "then I shall never envy (Nippur) again!"

a proper school; lines 17–20 explain the curriculum so that (line 21) Nabi-Enlil will (finally) have established a good school for his children.

Lines 23–25 go on to inform the addressee of his role in the education process. Perhaps he is to be the new teacher? The letter ends with an exhortation; assuming his instructions are followed, Nabi-Enlil will never complain again (or feel inferior to Nippur again). The letter's overall message clearly reinforces the superiority of a Nippur education.

There may be an additional layer intended to further mock the non-Nippur schools. The types of compositions mentioned in ll. 19–21 are not those known to us to have been part of the Nippur scribal curriculum. Thus, it may well be that the text is pocking fun at these non-Nippureans who do not understand truly the Nippur curriculum and so will never be able to rival it.

1. The reading of the personal name is uncertain. Civil 2000, 106 n. 8 reads N110 as [...]-/x\-ta? and X18 AN.DÙL-/eštar!?\ noting that the name Silli-eštar is attested in OB Nippur (e.g. Stone 1987, 279). VanDijk 1988, 449 n. 11 reads N110 as AN.KA.ŠA and X18 AN.KA-x-ra noting that x cannot be ša and a reading eš$_4$-tár is possible "nur mit Mühe." He settles for a reading *ilum-puzur$_4$-ra*, although he concludes that RA is more likely umbisaĝ. Volk (personal communication) suggests a reading AN.KA.SI.GA for X18 where KA.SI.GA is inim sig, "to express a desire." Although such a personal name would be unique, this solution best fits the traces.

4. Note the alternation of the 3rd person (bí-in-ak) in N110 for the 1st person (bí-a-ak) in X18 (Attinger 1993, 111 §41).

5. Compare Edubba C 70:

> di$_4$-di$_4$-lá inim-inim-ma hé-du$_7$ kaš hu-mu-un-ku$_7$-ku$_7$-dè-ne
>
> "The little fellows should enjoy like beer the sweetness of decorous words."

For a slight alternative, favoring N110, see Attinger 2005, 231.

6. mu-da, in place of the expected mu, is unexpected. Translation follows Attinger (personal communication) and Sallaberger (2008).

8. The name KA-^{d}Ninurta is attested in OB Nippur (Stone 1987, 256). It is unclear why N112 omitted lines 8 and 9, and the parallel line, line 14. Alternatively, the scribe who wrote X18 may have added these lines of his own initiative, or have copied them from a source which did.

12. For ka-inim-ma see ANL 4:8.

16. Another example of a conjugated verb without a perfix chain, for which see also SEpM 18:10.

18. For the imperative ending in -bi see Attinger 2004 and Sin-iddinam to Utu 38.

19. ka-tar = *dalīlu*, here something like "(vocabulary of) praise" = "panegyric."

21. Compare ŠB 310, in which Šulgi claims to have founded scribal schools in Ur and Nippur (and see Michalowski 2003a, 195f.). It may be the case that the humor of this line hangs on the use of ki-gal also as an epithet for the Netherworld (e.g. InDesc 1, 2, 3, etc.): "I will establish a 'hell' just like Nippur."

22. Source N118 puts this line after l.22 of X18. Civil's translation (2000, 106f.) follows this version and he understands these lines as an indication of the "humorous tone of the letter, even if the modern reader may fail to see the point." Based on Riddle 1:3 (Civil 1987b, 18–21) he restores as follows:

(22.) [...] I will put one talent of silver in their account.
(21.) I want to put (the school) on a pedestal like a [goose(?)]

24. For dù, "to impede, hinder," see most recently Wilcke 2007, 48 n. 124 with references.

25. For the use of dib in the sense of "neglect" compare ŠB 20:

> dub-sar ĝál taka$_4$-a níĝ-e nu-dib-bé-me-en
>
> "I am an experienced scribe who does not neglect a thing."

26. For a-la-la, a type of song, see now Shehata 2009, 236f. and compare SP 3.87:

> nagar ^{ĝiš}kibir$_2$-àm
> ad-KID ma-sá-ab-àm
> simug da tur-tur ak
> nar u$_8$!-u$_x$(PA)-a a-la-la
>
> "What characterizes the carpenter is the chisel. What characterizes the reed weaver is the basket. What characterizes the smith is the making of little... What characterizes the singer are the sounds ua and alala."

PSD A/I 100 understands a-la-la as a "work cry" (following CAD A/I 328f. "an exclamation of joy, refrain of a work song") and the other Sumerian literary references do seem to refer to a cry of a worker or sailor (e.g. SP 3.179, SP 7.77). This passage, however, seems to corroborate the use of a-la-la found in SP 3.87, cited above.

Izi and Lú were two of the advanced lists studied in the elementary education. According to the curriculum established by Veldhuis 1997, 57, Proto-Lú was studied before Proto-Izi.

ANL 10. Saĝ-lugalbi-zu to Nur-Kabta (3.3.16)

1. ^{m}nu-úr-^{d}kab-ta-ra ù-na-a-dug$_4$
2. ^{m}saĝ-lugal-bi-zu-ke$_4$ na-ab-bé-a
3. za-e zabar-dab$_5$ ù nar-gal-e
4. kù-^{d}nin-líl-lá abul-mah-a haš$_4$ dab$_5$-bé-da-en-zé-en
5. a-šà gi$_4$-gi$_4$-dè ur-^{d}suen-a [...] x lugal-ĝu$_{10}$ nam-maškim ì-tuku e-/x\-[...]
6. tukum-bi šà gi-na-zu-ta šeš-ĝu$_{10}$-me-en
7. di-ĝu$_{10}$ LÚ*GÁNA-t.-éš na-an-ne-en
8. mu di-da-ka-ni igi-zu-šè KA bal-e
9. lú mu-e-ši-in-gi$_4$ gú-zu na-an-šub-bé-en
10. a-ma-ru-kam

(1)Say to Nur-Kabta, (2)thus says Saĝ-lugalbi-zu:

(3)When you (together with) the zabardab and the chief singer, (4)detained Ku-Ninlila at the Abulmah gate, (5)Ur-Sin procured...-lugalĝu (to act) as baliff in order to (obtain) the return of the field.

(6)If in your true heart you are my brother, (7)do not mistreat me because of my case! (8)Because (he wishes) to discuss his case with you, (9)I am sending you a man. You must not neglect him! (10)It is urgent!

Commentary

1f. Although unattested in the Ur III administrative corpus, the name Nur-Kabta occurs in OB (e.g. Stone 1987, 272). Saĝ-lugalbi-zu is unattested in both Ur III and OB archival sources. The name does occur, however, in the OB Nippur PN List B l.18 (= Çiĝ and Kizilyay 1965, 44); see also the discussion in Michalowski 1978, 115.

4. While N119 and X24 give the name as Ku-Ninlila, N105 substitutes Ku-Enlila. While Ku-Ninlila is unattested in the Ur III corpus, Ku-Enlila is not uncommon.[120] Contra Civil 1999–2000, 184, dab$_5$-bé-da-en-zé-en

[120] Although likely nothing more than coincidence NATN 868 declares the release of one Ku-Enlila:

(1.) kù-^{d}en-líl-lá
(2.) dumu šeš-al-du$_{10}$
(3.) šu bar-a-ni

Moreover, the seal, although mostly worn belonged to a singer, ^{d}[x]-nin-x-PAP-x nar.

cannot be an imperative given the ergative in line 3. Moreover, the syntax of both OB Akkadian archival letters and the Sumerian letters dictates that the first part of such documents should be declarative; imperative clauses come only after the tukum-bi clause (Sallaberger 1996b, 144ff.). Thus, the verb here is most likely a participle.

5. Ur-Suena is one of the most common names in the Ur III onomastica, attested almost 1300 times and over 100 times at Nippur. On the role of the maškim as a judge's aide see Lafont and Westbrook 2003, 193 with references.

6. Although unattested in Sumerian legal texts or letter orders, the Akkadian equivalent of this expression—*šumma ina kittim ahī atta*—is a common appeal in OB daily-life letters (see the references collected in Sallaberger 1999b, 187f.).

8. On the form di-da-ka-ni see Michalowski 1978, 117. On the reading KA bal see SEpM 22:9.

(10)It is urgent.

Commentary

This letter, part of the CKI, follows ANL 6 version A, which of course, is not a royal letter.

5. The month iti ezem ^{d}nin-MUG is the eleventh month attested only in Sargonic and Ur III Adab (Cohen 1993, 202). Its presence in a Nippur text is unclear. For the reading of the sign MUG/ZADIM see Cavigneaux and Krebernik 1998–2001, 471.

4. [...] /bí-in\-[...]

(rest of obverse broken)
(beginning of reverse broken)

5. [...] /x x\ nam-/x\
6. [...] bí-in-dé-dé
7. [...]-/x\-na ĝiri$_3$![121] lí-bí-in-DU

Discussion

N114 is a right-hand upper edge fragment, with very small writing suggestive of a type I tablet. Indeed, that this text must be a multi-columned tablet, with l. 7 the last line of the first column on the reverse, is logical given that otherwise this line would be a very strange letter ending. As a result, it may be the case that the obverse and reverse texts are not part of the same composition.

[121] The sign is anše, but ĝiri$_3$ better fits the (albeit limited) context.
